Lancaster Farming

Vol. 19 No. 39 | Lancaster Farming, Saturday, August 10, 1974 | $2.00 Per Year.

Lancaster Farming Photo

Tobacco harvest came about as early as it ever did this year for Ammon Shelly, Lititz RD2. Usual first harvest date for Pennsylvania Type 41 tobacco is about August 10, but Shelly said his crop was ready a good week earlier. Shelly also said this is one of the best crops he's ever seen.

Barring Weather Damage . . .

Excellent Tobacco Harvest Predicted

Ammon Shelly was spearing tobacco this year about as early as he's ever done it, and as far as we could tell, he was the first farmer in Lancaster County to start filling his tobacco shed.

"I got my plants in by May 26," Shelly told Lancaster Farming, "where usually I don't get them in much before Decoration Day." Shelly expects this year's crop to be among the best he's ever had. He grows about 5 acres on his Lititz R2 farm.

"Everything just seemed to go right this year," he said. "We got rain at the right time, and we had dry weather at the right time. Some of my plants were topped for 23 days when I started cutting, and they look very good."

Associate Lancaster County Agent Arnold Lueck said he's seen some very good fields of tobacco throughout the county, and ispredicting an excellent crop if no major weather catastrophes occur between now and the end of August.

Lueck said that August 10 is the usual early harvest date for tobacco in the county. Nearly all of the crop is generally harvested between August 25 and September 20, with some years seeing tobacco still coming in until the first of October.

Another grower, A. K. Mann, said he expects to start harvesting some of his 25 acres by early next week. Mann said his father, George Mann, was very close to harvesting some of the 80 acres he grows on three farms near Manor, and all of it is looking very good.

When we talked to John Yocum on Friday morning, he said, "We plan to top some of our tobacco today, so we'll be harvesting it in another two or three weeks. Our crop looks very good so far, and so do the other crops I've seen."

Yocum is director of Penn State's Field Research Laboratory near Landisville. He noted that some of the earliest varieties might not yield to high because of a dry spring, but that the later crop should do exceptionally well. "Pennbel is going to be very big," he said.

Arthur Reist, 1050 Eden Rd., Lancaster, said their crop isn't ready to cut yet, but they've got no complaints at all about their tobacco this year. He said they have about eight acres of tobacco and, barring hail and damaging wind and rains, they should have one of their best crops ever.

Conservation Field Day Draws Good Turnout

"The best crowds we've ever had," was the way Everett Kreider described attendance at this year's Lancasteer County Soil Conservation Field Day and Plowing Contest which was held Tuesday. Kreider, a director of the Lancaster County Conservation District, is this Perennial field day chairman. At least 150 people came to Harold Hough's farm at Peach Bottom R1 to watch and participate in the contour and level land plowing contests, and an FFA soil judging contest, topped off by a scramble after a greased pig arranged for children 13 and under, and a rooster chase for children eight and under.

Harvey Sauder, New Holland R1, won the contour plowing contest for the third year in a row, which means he retires the traveling trophy presented each year to the winner of that event. Frank Burkhart, 1030 Silver Spring Road, Lancaster, took the level land honors, repeating county wins in 1971 and 1972.

Both Sauder and Burkhart are elegible for berths in the state plowing contest set for August 28 in Bloomsburg during Ag Progress Days. Lancaster County will also be represented in the state

York DHIA

This week marks the first appearance of the York County DHIA results in the pages of Lancaster Farming. The figures will be run every month. Now appearing in this newspaper are DHIA figures from Lancaster, Lebanon, Chester, Berks and York Counties.

Dairy Princesses Named In Berks, Dauphin Co.'s

Last weekend, both Berks and Dauphin Counties saw the crowning of new dairy princesses. Debra L. Miller, 17-year-old daughter of Mr. and Mrs. Paul E. Miller of Linglestown R4, was named Dauphin County Dairy Princess on Friday night at the Middletown Community Building.

The following evening saw Susan Seidel crowned Berks County princess at the Kutztown fair grounds.

Miss Miller is a graduate of Central Dauphin High School, and is a member of the Singing Millers, a well-known family singing group.

Dauphin County runnerup was Marjie Kay Hoffer, 18, daughter of Mr. and Mrs. Aaron W. Hoffer, Middletown R1. Miss Hoffer is a Middletown Area High School graduate now attending Harrisburg Area Community College, where she is majoring in the library technology program.

The winner was crowned by Ralene Harbold, 1973 Lancaster County Dairy Princess. Judges for the event were Mrs.Sally Bair, wife of Lancaster County associate agent N. Alan Bair and herself a former Adams County dairy princess, Robert Staz, owner and manager of Brookwood Dairies, and Willis Ritchie, director of member-service for Atlantic Breeders.

Gayle Carson, program director for the Pennsylvania Holstein Association, was kept busy performing as master of ceremonies at both the Friday and Saturday night events.

In Kutztown, a throng of people crowded into the amphitheater of the Fair Grounds to see Miss Seidel accept her crown from Phoebe Ruth, 1973 Berks

Lancaster Farming Photo

Raising market lambs is one of the many livestock projects that the Strauss boys have. Each is shown with one of the three breeds they keep on the farm.

Strauss Brothers

Teamwork Really Counts

by: Melissa Piper

For the three sons of Mr. and Mrs. Robert Strauss, RD1, Ephrata, teamwork is what really counts.

Robert, 18, Richard, 15, and Steve, 14, have been working together on several FFA projects over the past few months. Their projects have included corn, market hogs, market lambs and vegetable gardens.

Richard and Steve combined their labor recently in building a new animal barn which will be used for lambs and market hogs. The building which involves some intricate work has been nearly finished to perfection and for young men in their teens such perfection is commendable.

Another team effort involving Robert and Richard paid off last week when their market hogs captured the Reserve Champion honors at the FFA Hog Show and Sale.

The brothers have also combined their efforts and won numerous prizes for their animals and vegetables at the area fairs. They have shown the grand champion market lamb at the Ephrata Fair and have placed third in the carcass lamb division. Along with many blue ribbons for their vegetables.

Last year at the Pa. State Farm Show the boys had the Grand Champion Medium FFA hog and placed second in the light-heavy hog division.

Although the boys believe

Composite Report

Friday, August 9

	Cattle	Calves
This Week	5300	1650
Last Week	4594	1302
Last Year	4475	1199

CATTLE: Slaughter steers 1.00-2.00 higher, best demand on Choice and Prime; Cows 2.00-3.00 higher; Bulls and Bullocks 1.00-2.00 higher. instances 3.00 higher on bulls. Supply included an estimated 50 per cent slaughter steers, 15 percent cows, 15 per cent bulls with the balance mainly feeder steers.

SLAUGHTER STEERS: High Choice and Prime 1050-1300 lb. 49.25-50.75 with around a load on Wednesday 51.00-51.75; Choice 950-1400 lb. 46.00-50.00 with yield grade 2 49.75-51.00, few sales 51.00-51.75; high Good and low Choice 43.00-47.50; Good 38.50-44.50 with Good Holsteins 36.75-39.00; Standard and low Good 31.00-37.50.

SLAUGHTER HEIFERS: Choice 850-1050 lb. 39.25-43.50, few 44.00-46.60; Good 36.25-40.00.

COWS: Utility and high dressing Cutter 27.50-30.50, few 30.50-31.75; Cutter 25.75-28.00; Canner and low Cutter 24.00-26.00.

BULLOCKS: Choice 900-1250 lb. 36.00-38.75, few sales mainly at the close 39.00-42.25; Good 32.00-37.00.

BULLS: Yield grade 1 1100-1600 lb. 35.50-39.50, few 39.75-42.25, couple 43.00; yield grade 2 950-1300 lb. 31.00-36.00, most late sales 33.00-36.00, few 900-1050 lb. early part of week 28.00-30.50.

VEAL CALVES: Vealers generally steady, instances 2.00 higher on Choice and Prime. Supply mainly Utility and Standard with a fair showing of Good. Choice and Prime scarce.

VEALERS: Few Prime 75.00-81.00; Choice 60.00-71.00; Good 49.00-57.00; Standard 37.00-48.00; Utility 90-120 lb. 32.00-41.00, 65-85 lb. 28.00-33.00.

RETURNED TO FARM: Few head 100-125 lb. Holstein Heifers 39.00-43.00; bulk 100-125 lb. bull calves 39.00-42.50, few 43.00-48.00.

HAY MARKETS

New Holland

Monday, Aug. 5

23 loads of Hay and 6 loads of straw sold as follows: (prices per ton)

Alfalfa 49.00-83.00; Timothy, few loads 40.00-54 00, Mixed hay, few loads 31 00-55 00, Straw 39.00-44 00; Clover, few loads 49 00-58.00, Corn, 11 loads 107 00-115 50, Barley, $2.50 per bushel; Barley & Oats screening $70 per ton.

Regional

Monday, Aug. 5

(All hay No. 2 and better prices paid by dealers at the farm price per ton.)

Hay and straw steady.

Alfalfa 40.00-60.00; Mixed hay 30.00-35.00, few to 45.00; Timothy hay 25.00-30.00; Straw 25.00-32.00; Mulch 12.00-25.00.

Green Dragon

Prices Per Ton:

31 loads hay & 8 loads straw

Alfalfa, few loads 49 00-80 00
Timothy, few loads 43 00-69 00
Mixed hay 40 00-68 00
Clover, one load at 46 00
Straw 35 00-39 00

Paul Z. Martin

Wednesday, Aug. 7

12 loads of hay, straw and ear corn sold as follows

Alfalfa 66, 65, 85 Timothy 56, Mixed Hay 34 50, 55, Straw 35, 36, 38, Corn 109 00

Local Grain

Thursday, August 8

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, August 8, 1974 are as follows:

	Bid+	Offered+
Ear Corn	95.00	102.00
Shelled Corn	3.90	4.12
Oats, Local	1.75	1.95
Oats, Western	2.06	2.28
Barley	2.20	2.50
Wheat	3.70	4.00
Soybeans	7.95	8.20

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Peoria Cattle

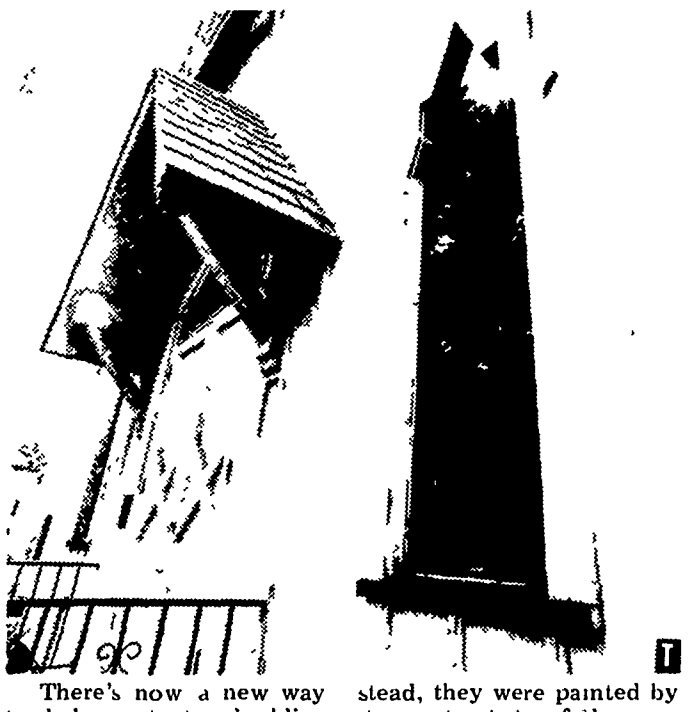
The border between East and West Berlin was sealed off by the East Germans on August 13, 1961.

Japan surrendered on August 14, 1945, thus ending World War II.

The Panama Canal officially opened on August 15, 1914.

NEW OUTLOOK ON WINDOWS



There's now a new way to help protect a building from thieves a window material that's almost completely unbreakable

This product also can be used for storm doors and storm windows, to help prevent accidents and vandalism

One place where it's uniquely being used is on the windows of Trinity Episcopal Church in Jefferson, Ohio Built in 1876, this church is a classic example of the steamboat Gothic architecture popular in the midwest at the time, and it is blessed with a set of stained glass windows that is rare Unlike traditional stained glass windows, these are not a mosaic made from pieces of leaded glass in stead, they were painted by itinerant artists of the period to create a stained glass effect Unfortunately, this has made them both irreplaceable and sadly subject to wear by weather. To prevent further deterioration, the cherished windows have been covered with the virtually unbreakable material. This product, which might be called a modern miracle of a plastic, is LEXAN Sheet from General Electric

A little piece of clear, practically impervious plastic, can provide a lot of protection for places with stained glass and plenty of other windows And it does all this without marring the appearance of the window or spoiling the view, as glass embedded with wire mesh or screening would

Sweet Bulky Great in Brood Sow Rations, Too!

Sweet Bulky... dairymen have been using it in their milking rations for a long time. The reason? It makes feed taste better, work harder. more digestible and more palatable. Well, sir, **Sweet Bulky** works equally great in brood sow rations, too. When used around farrowing time, it really comes through. Great for eliminating constipation. **Sweet Bulky** contains minerals, vitamins, beet pulp, dehydrated alfalfa meal and molasses. Those ingredients tell a story all their own. **Wayne Sweet Bulky** for hogs . . try it.

Leach Named to Post at Sperry New Holland

George A. Leach Jr., quality control services supervisor at Sperry New Holland, has been appointed safety and health staff engineer at the firm's main office in New Holland, Pa.

He succeeds Truman Coy, who retired on August 1.

Leach will serve primarily in an advisory capacity, helping all Sperry New Holland company locations in the U. S. to develop policies and practices which conform to a growing number of state and federal safety and health laws. This

George A. Leach, Jr.

will include the areas of environmental control, fire protection, noise abatement and first-aid. He will also provide assistance and direction as requested by the company's Canadian branches and retail stores.

Leach joined the company in 1954 as an industrial engineer. He was promoted to senior industrial engineer and joined the quality control department in 1956. He served three years as standards manager at the firm's former plant in Lancaster and was named to his present position at New Holland in 1966.

He is an instructor with the American Red Cross, involved in training ambulance and rescue squads in Lancaster County. A native of Ardmore, Pa., he attended the Wharton School of the University of Pennsylvania. He and his wife, Helene, reside at Bird-in-Hand R1, Pa.

Coy began his employment with Sperry New Holland in 1949 as a production engineering manager in the manufacturing division. He held this position until being named staff engineer for safety and health in April 1972. His entire period of employment with the company has been in the manufacturing division.

He served on the New Holland borough council for 11 years. A member of the Society of Manufacturing Engineers, he served as chairman of that organization in 1961-62. He has also served as a Republican committeeman in New Holland and has been active on Boy Scout work. In 1973 he was United Way chairman for the New Holland area.

Coy is a graduate of Ohio State University. He and his wife, Ruth, reside at 586 Valley View Drive, New Holland.

Manager Amos Myers says:

"Rate the performance of FNB's new Penn Hill office. It may win you this 19-inch, color television set!"

"When Farmers National opened its Penn Hill office last October, we brought to Southern Lancaster County more than the finest facility of its kind.

"We brought 'banking the way you'd do it': Our commitment to provide the services and conveniences that customers truly appreciate.

"Are we succeeding? Rather than rate ourselves, we'd like you to help us. And, for doing it, we'll give you a chance to win a beautiful, 19-inch Zenith color television! There's no cost to enter, and no obligation!

"Just make checkmarks appropriately below. Cut out and mail or take the form* to our Penn Hill office (address at bottom of ad). Then wait for notice of the winner to be published, after the prize drawing on Oct. 4.

"You've nothing to do but candidly tell us how we're doing. So please do!"

Farmers National Bank of Quarryville

When returning coupon, remember to include your name, address, and phone number.

Area Grange Activities

Lancaster County Pomona Grange No. 71 will hold their annual picnic at the Holtwood Athletic Field Saturday, August 17, 7 P.M. Everyone is requested to bring a meat dish, another dish and their own place setting. Rolls, butter and iced tea will be provided by Colerain Grange No. 1667. Mrs. Jesse Wood will be in charge of games after the meal. Grangers and guests are invited to attend.

Fulton Grange 66 held their annual picnic July 22nd. on the Grange Hall grounds at Oakryn. After the meal the Master Charles McSparran conducted a brief business meeting. The Lecturer, Miss Joyce Galbreath, and Mrs. J. Stanley Stauffer Jr. were in charge of games. Miss Galbreath announced that the art and photo contests will be held in September.

Four officials of the Wakefield Ambulance Association will have the have the newly purchased ambulance on display at the August 12th. Grange meeting and will tell how it operates, how to secure its services and answer any questions concerning it.

The Youth committee will sponsor a swimming party at the home of Mr. and Mrs. Earle Gilbert Sr., Port Deposit R.D., Md. Friday, August 16. Grangers and guests will go in a group, leaving the Grange Hall at 7 p.m.

Pa. Third In Peach Production

Early peaches grown in Pennsylvania orchards now are available in supermarkets, at roadside stands and public farm markets, Secretary of Agriculture Jim McHale said today.

"We have recovered from two years of short peach crops," Secretary McHale said, "and this year will have an adequate supply. Our consumers can expect to be able to buy prime mountain-grown Pennsylvania peaches from now until after Labor Day. They'll find them of excellent color and flavor."

Pennsylvania's production for 1974 is estimated at 2,083,000 bushels, making the state third in the nation, following California and South Carolina. Most of the peaches are of the free-stone type, which are best for eating fresh. They also are excellent for canning or freezing.

The first variety to become available is Red Haven. Midseason varieties include Sunhigh, Loring, Blake, and Redskin. Late varieties include Elberta and RioOsoGen(cq.).

Most Pennsylvania peaches are grown in Adams, Franklin and York Counties, with other leading counties including Berks, Lehigh, Juniata, Lancaster and Erie.

THE OLD FARMER'S ALMANAC

AUG. 12-18, 1974

The quiet August noon has come.

Watch for meteorites when nights are clear this week . . . Blondin crossed Niagara on tightrope Aug. 17, 1859 . . . New moon Aug. 17 . . . Cat nights begin now . . . Average length of days for week, 13 hours, 57 minutes . . . Fireball in Ohio and Indiana sky Aug. 18, 1944 . . . Women's dresses ankle length 1947 . . . Railroads first carry mail Aug. 14, 1838 . . . He that knows least presumes to know most.

Old Farmer's Riddle: What friends should you have around you when you feel tired? (Answer below.)

Ask the Old Farmer: Why are some fire trucks known as "hook and ladder" trucks? F. S., Alexandria, La.

Such trucks used to carry a huge hook on a pole to haul wooden buildings apart — the better to contain the fire.

Home Hints When cooking noodles or spaghetti, add a bouillon cube to the boiling water Your pasta will have added flavor . . . *Riddle answer* Only nodding acquaintances

OLD FARMER'S WEATHER FORECASTS

New England: Rain to start, then pleasant; rain again latter part, heavy inland and light along coast.

Greater New York-New Jersey: Showers at first, then mostly cloudy and warm; heavy rain at end of week.

Middle Atlantic Coastal: Quite warm and rainy most of week; clearing and very warm by weekend.

Southeast Coastal-Piedmont: Light rain and cool most of week; clearing except along coast by weekend.

Florida: Hot and rainy all week; rain heavy during latter part.

Upstate & Western N.Y.-Toronto & Montreal: Rain to start, then pleasant and warm; rain again latter part, then clearing on weekend.

Greater Ohio Valley: Intermittent rain and cool all week; rain very heavy in east latter part.

Deep South: Heavy rain in northwest at first, then cloudy and cooling; rain except in south latter part, then clearing.

Chicago and Southern Great Lakes: First part of week cooling with light rain, end of week mostly clear and quite warm.

Northern Great Plains-Great Lakes: Week begins rainy, then sunny and warm; end of week showers in west and rain in east.

Central Great Plains: Cloudy and cooling at first, then heavy showers; cloudy and hot latter part.

Texas-Oklahoma: Most of week rainy in central and north; sunny and hot all week along Gulf.

Rocky Mountain Region: First part of week sunny and very warm; end of week rainy and cooler.

Southwest Desert: Early week mostly clear and very hot; partly cloudy with showers latter part.

Pacific Northwest: Rain most of week; generally clear and warm by weekend.

California: Cloudy all week in south; rain to start in north, then clear and warm to end of week.

Area FFA Members Receive Top Honors

Dan Reuwee, Director of Information for the National FFA Center, recently announced that several area FFA members had been selected to receive top regional and national awards.

Jacob W. Musser, 21, of Quarryville, Lancaster County has been named North Atlantic Regional Star Agribusinessman for 1974.

Musser, is the son of Mr. and Mrs. Jacob H. Musser of Quarryville and is a graduate of Garden Spot High School.

He was active in the Grassland Chapter of FFA and worked his was up to forman in Weaver's Poultry Plant.

The Agribusiness Award was based on his achievements in one or more areas of non-productive agriculture as well as leadership in FFA activities. Musser was among three other regional agribusinessmen who were chosen from 642 applicants.

As Star Agribusinessman, Musser will receive a cash award of $500 presented by the National FFA Foundation at the National Future Farmers Convention in Kansas City, Missouri, October 15-18.

Selected to receive the Regional Star American Farmer Award was John Roland Moyer, 21, RD1, Newmanstown in Lebanon County.

Moyer is the son of Mr. and Mrs. John R. Moyer and is presently working on his own dairy farm.

Selection of the Star American Farmers is based on achievement in agriculture and leadership in FFA activities. Moyer was also among three other regional winners selected from 642 applications.

Moyer will also be receiving a cash award of $500 from the National FFA Foundation at the National Convention.

Eight area FFA members were also selected to receive the American Farmer Degrees from the National FFA Center.

They are Michael Hartman, RD1, Robesonia, Berks County; Boyd Hitz, RD1, Annville, Lebanon County; Roy P. Hoppes, RD2, Hamburg, Berks County; Joseph Lefever, RD4, Manheim, Lancaster County; John R. Moyer, RD1 Newmanstown, Lebanon County; Jacob W. Musser, RD1, Quarryville, Dale Martin Nolt, RD1, Manheim, Lancaster County and Jay Zimmerman RD2, Denver, Lancaster County.

The American Farmer degree is based on the member's activities in FFA and their leadership abilities in either productive farming or agribusiness.

Cary Grant, whose real name is Alexander Archibald Leach, has made more than 70 movies, according to World Book Encyclopedia.

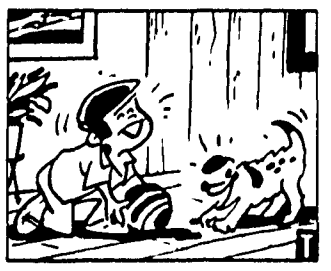
Wood Enjoys New Popularity

Perhaps it reflects a new respect for natural resources, an outgrowth of the many shortages that have come to our attention recently Maybe our eyes have tired of the brilliant colorings in paint, fabrics and furnishings and the starkness of plastic, glass and metal that have marked home fashions in the past decade.

Or, possibly, in taking a new look at our values and lifestyles, many of us are weary of devoting so much time to the care of possessions, some of which have not performed as promised.

Whatever the reasons, natural products and colorings are returning full force to interior design, and prime among them are woods in the warm brown tones--palest birch to deepest mahogany, easy to live with and to combine with other subdued colors.



Wood Paneling Requires Minimal Care

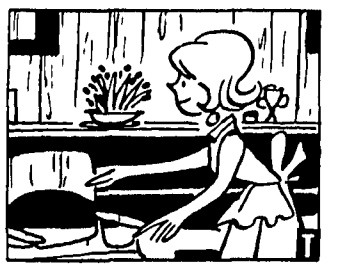
To the home-or apartment-dweller who dreads repainting or papering walls every few years, wood wall paneling offers a long-term decorating solution Available in a vast choice of grains and colors, with finishes ranging from textured or matte to sleek and high-gloss, wood paneling needs only occasional dusting with a long-handled lambswool applicator to keep dirt particles from scratching the finish, and once-in-a-while treatment with Scott's Liquid Gold, a wood food that keeps paneling both healthy and beautiful

How frequently wood food should be used depends on the paneling's environment high or low temperature, humidity and sunlight affect wood's moisture balance and call for frequent treatments, perhaps monthly. Ideal conditions--70°F and 50 percent relative humidity--necessitate only semi-annual care, during spring and fall housecleaning Easy to apply, Scott's Liquid Gold is simply wiped on and wiped off with the applicator.

An organic chemical combined with a penetrating agent and solvents, Scott's Liquid Gold also can be used as needed to wipe away dirt and grime, to darken and camouflage nicks and scratches, to inhibit the growth of mildew, and to resist dust Leaving wood negatively-charged, Scott's Liquid Gold repels dust particles, which are also negatively charged (Note Always use a finely-woven hemmed cloth or chamois for dusting to avoid lint.)

Floors, Furniture Also Benefit

The same treatment--dusting and feeding--will keep other wood in the home in tip-top condition Floors and furniture, now waxed, should be treated to heavy repeated applications of wood food until all the old



wax and soil have been removed and the original moisture balance and natural beauty of the wood have been restored

Furniture finished with lacquer, varnish or shellac will absorb Scott's Liquid Gold through microscopic pores in the finish However, if the finish itself has been damaged, refinishing may be needed, after which dusting and occasional treatments with wood food will keep the furnishing at its best for many years

Editor's Quote Book

Peace of mind: The contentment of the man who is too busy to worry by day, and too sleepy to worry at night

A Better Way

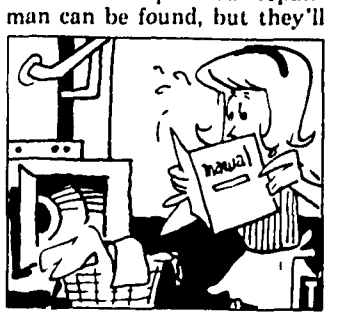
SELECTING SERVICE

While most people are pretty practical when it comes to purchasing an appliance, they sometimes fall apart when it doesn't work properly

Before you panic, it's a bright idea to check the appliance's electrical wall plug or the pilot light Keep yourself under control and make sure the controls are set correctly. See if vents and grills are clogged, the faucets closed Before you blow your fuse, find out if a circuit breaker has opened or a house fuse has blown

Next, re-read your owners' manual to make sure you've handled everything correctly

If you have, and you need professional help, see what the warranty requires. Some manufacturers specify that only certain servicemen repair their machines Others ask that you return the defective part to the store or the manufacturer, and you'll be in a fix if someone else fixes it. If the warranty no longer warrants reading, ask the place of purchase to repair your ailing appliance, or to recommend someone who will. If they can't, write or call the manufacturer. With a Whirlpool appliance, you can dial the company's Cool-Line Service at 800/253-1301 (in Michigan 800/632-2243) toll free, and they'll not only tell you where the nearest qualified repairman can be found, but they'll



also answer any question you may have about the appliance

Make sure you call the proper repairman for your particular brand of appliance, and that he's the best for the job The Better Business Bureau can also advise you.

Should you still need help, or if you aren't satisfied with the service, write to:

Major Appliance Consumer Action Panel (MACAP)
Association of Home Appliance Manufacturers
20 North Wacker Drive
Chicago, Illinois 60606

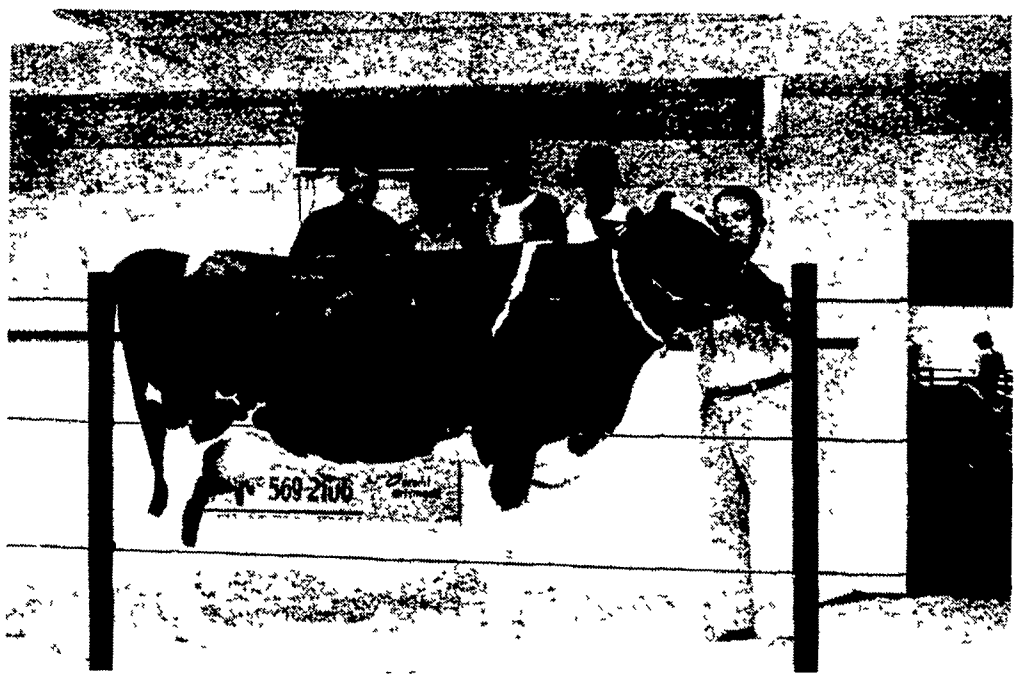
To insure prompt handling, give MACAP specific information on the appliance, place and date of purchase and the service company.

Congratulations

SAM & MARIAN LONG,

Christiana, Pa.

FOR AN OUTSTANDING ACHIEVEMENT



DOREIGH FARMS MAGIC ROSIE
DAUGHTER OF WINFARM RAG-APPLE MAGIC

Production 18,328 lbs. milk, 583 lbs. fat in 320 days

This 2 year old Heifer was classified on June 3, 1974 while standing dry. Classified very good, score 88.

This Heifer was consigned, National Convention sale on June 13th.

Selling price $20,500.

It is one of many high producing heifers in the Sam & Marian Long Herd.

The Rolling herd average as of July, was 16,358 lbs. of milk, 3.9 butterfat test, 637 lbs. butterfat. Included in the herd are 12 first calf heifers, and 7 second calf heifers.

This is proof positive of the TOP dairy management breeding and feeding program on this farm.

Feeding program on this herd has been Purina, calf heifer, dry cow and milking ration.

The forage and feeding program are 50 to 60 lbs. corn silage per day, 5 lbs. hay and 18% dairy ration.

Serviced by **JOHN HESS II,**

Paradise, Pa.

Penn Willow 4-H Round-Up

Penn Willow 4-H Club held its community round-up at the Conestoga Elementary School on August 6th at 6:30 p.m. Approximately 160 4-Hers and their families attended the round-up which began with a covered dish supper.

After the social, 4-H members and families viewed the exhibits or played games. The following is a list of 4-H exhibits that were shown: knitting, sewing, vegetables, flowers, rabbits, handyman and bike.

At 8:00 p.m. a bike rodeo was presented. Penn Willow is the first 4-H club in Lancaster County to ever have a bike project. The project includes stressing of bike laws and code, safety, proper riding techniques, passing a 50 question exam, different activities on the bike, signals and games.

Following the bike rodeo two demonstrations were given. Julie Jenkins and Paul Jenkins had a saddle demonstration on "Parts of a Saddle." Cooking over the coals group then gave a demonstration on building a fire. After the talk the group made S'mores for interested guests.

The Fun to Bake cooking group put on a skit entitled "The Four Food Groups". Next the Mealtime Magic Cook Group had a skit "Dos and Don'ts of Baking". Adventures with Food group also had a skit entitled "Setting the Table Properly".

Presenting the awards for the evening were Doris Thomas and Jay Irwin from the Farm and Home Center. Awards are as follows:

Start Stitching
Blue Ribbons

Rose Harrington, Pamela Goss, Robin Knier, Joyce Sourbeer, Charleen Roach, Kelly Kolb, Phyllis Spence, Julia White, Pauline Nolt and Lisa Ober.

Brenda Huntzinger displays her rabbit at the Penn Willow Round-up as part of the many exhibits.

Lori Kreider makes her way through the obstacle course during the bike rodeo at the Penn-Willow Round-up.

Klassy Klippers

The annual round-up and fashion show of the Landisville Klassy Klippers 4-H Sewing Club was held on Thursday, July 25, from, 9 to 12 noon in the cafeteria at Centerville Junior High School with mothers of members as guests. Forty-four persons were in attendance.

The morning activities began with the 4-H Club Pledge. The following demonstrations were then given: "Burlap Wall Hanging" by Melinda Grube, "Belt Hanger" by Sarah Roth, "Covered Snaps" by Cathy Brubaker, and "Modeling" by June Grube. Fun was had by all with games led by the Entertainmet Committee.

A very informative slide presentation on 4-H awareness was given by Miss Anne Hinkel, Extension Assistant Home Economist.

Following lunch the fashion show was held with Melinda Grube serving as commentator. Garments showed ranged from the tote bags of the "Start Stitching" members, to the skirts, smock tops, dresses, pants suits, and coats of the older members.

Teen leaders, Sarah Roth, Sandy Arnold, Melinda Grube, June Grube and Cathy Brubaker, were thanked for their help with the first year girls.

Teamwork Counts

(Continued from Page 1)

that working together certainly accomplishes much, each have contributed in their own separate way.

Robert is the oldest brother and just graduated this year from Ephrata High School. He was a member of the Cloister Chapter of FFA and served as secretary in his senior year and chaplain in his junior year.

In 1973 Robert won the Ephrata JayCee steer and raised the animal to show. This year at the FFA State Days, Robert placed 9th in the Poultry judging contest.

His freshman year, Robert placed second in the state in Dairy Products judging at FFA Days and won a trip to Kansas City. While a sophomore, he judged on the meats team and placed 8th in state competition. Last year at the activities day he placed 4th on the Livestock Judging Team and won a trip to Richmond, Va. to the Eastern States Exposition.

Perhaps his most outstanding accomplishment was being chosen as a Kaystone Farmer in 1974.

Robert explained the award by saying "the Keystone Award goes to only 2 percent of the FFA members in the State and is awarded according to the project work and activities you have participated in."

The Strauss brothers (from left) Richard, Robert and Steve take pride in the medals they have won by working together on a number of projects.

Lancaster Farming Photos

Richard, who is 15, has helped his brother, Robert on many projects from gardening to livestock. He is also an accomplished carpenter whose work is outstanding for a young man. Richard has built three greenhouses which he has erected behind his parents home.

Richard will be a sophomore at Ephrata High School this year and will be continuing projects as a member of the Cloister FFA. Richard has played on the FFA basketball team and the baseball team also.

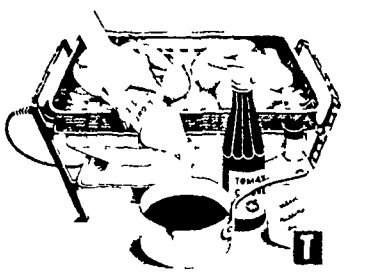
Steve is the youngest of the Strauss brothers but helps quite a bit. He will be a freshman this year at Ephrata and is looking forward to joining the Cloister FFA.

During junior high school he was a member and officer of the Junior Ag Club and has carried many projects including livestock and garening.

Steve explained that he is anxious to join the Cloister Chapter but was a little afraid of their "notorius initiation".

Working together has paid off for the Strauss brothers as evidenced by their many trophies and ribbons that have been proudly displayed in their den. Each has taken pride in their individual work but are even more proud of the awards that they have won by working together. For them teamwork is what really counts.

Meat Price Break Good News



With meat and poultry prices down, barbecue fans can now look forward to more than the formerly anticipated number of cookouts. Whether you barbecue over charcoal, gas or electric, the sauce is all important. Here's a quick one as easy as one two three

QUICK BARBECUE SAUCE

1 cup tomato catchup
1/4 cup Karo dark corn syrup
1/4 cup bottled Italian dressing

Stir together catchup, corn syrup and Italian dressing Brush on meat or poultry during cooking Makes 1 1/2 cups sauce.

Farm Commentary

Three is Really a Crowd.

G Sherwood Huntzberger had a surprise last Friday when one of his grade Holsteins presented him with three new calves, two heifers and a bull weighting a total of 215 pounds. The birth of triplets is a rarity in the bovine world, with odds of one to 48,000 against it.

Western Europe Has Beef Problems Too

Recent reports from Europe indicate that cattle farmers' incomes in the nine EEC countries are plunging and a mountain of beef is growing in storage The present system of support price for producers has caused this surplus, and it now threatens to break down the support program

European Economic Community farmers are presently receiving in the marketplace only 88 percent of the fixed beef price Deliveries to government storage have shot up since March March storage holdings were a manageable 40,000 tons, but have now reached 100,000 tons It is rumored that there will soon be a subsidized sale of beef to Russia (similar to the butter affair of the year ago) and this can be expected to raise a furious outcry in and out of the European Economic Community. Some farmers have even been advised to sue the authorities who can no longer take surplus beef because storages are filled to capacity.

On top of the beef already in storage is the 750,000 tons of imported beef being delivered under existing contracts this year. These contracts were probably negotiated last year when a severe beef shortage was being predicted for 1974.

Even if the nine partners manage to unload the current beef crisis, they could like the rest of the world, be swamped by still bigger beef surpluses in 1975.

We have talked for years in the U.S. about the potential to export beef if we ever overexpand. Now we find ourselves in a plentiful beef situation and bans on our beef have been imposed in Japan, Canada, and Western Europe. We may have to eat our way out of our own developing beef surplus.

GOP Holds Lancaster County Ag Hearing

A meeting was held Monday at Andy's Restaurant, near Millersville, to probe the attitudes of farmers on the state government's role in agriculture The meeting was set up by Amos Funk, chairman of the Republican Agricultural Platform Committee which is working on behalf of the Lewis campaign for governor

The biggest beef aired by farmers at the meeting was the lack of action by the Pennsylvania Milk Marketing Board Daniel Martin, a Manheim RD1 dairy farmer and a director of the Inter State Milk Producers Cooperative, said the Milk Marketing Board has been "totally derelict" in its duties

"The board's inaction," Martin said, "is wrecking the Pennsylvania dairy industry and forcing Pennsylvania producers into federal milk order markets." Martin added that he felt the board should be maintained, but that it should actively enforce the milk marketing laws.

Other concerns aired at the meeting dealt with the problems too much big government, problems with soil conservation planning, and the spectre of federal land use laws.

Will-wonders-never-cease Department

A doctor in St Charles, Ill , has been giving his patients a pink slip with their bills for the past six years The slip says, in its entirety: "TO ALL MY PATIENTS -

My fee schedule is based upon standard medical practice in this area

However, for retired persons on limited pensions, or any others whose financial circumstances are difficult due to extensive illness, unemployment, or for other reasons, I will reduce my fees

Under these circumstances I suggest a 25 percent reduction, but more or less may be appropriate to your situation No discussion is necessary - simply write the amount of reduction you choose on the statement with your remittance

Reasonable and regular partial payments are satisfactory

Richard R Grayson, MD"

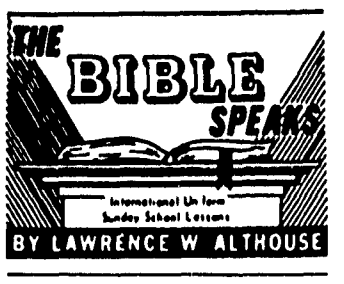
Dr Grayson told the American Medical Association that his is an honor system, and that only two or three percent of his patients do, in fact, reduce their bills

"Mostly," he said, "the patients who reduce their bills are older people, trying to survive on their Social Security checks, or people who are of work, or young families who have got caught in the inflationary spiral

"Only twice, that I know of, did patients reduce their bills just to see what I'd do about it. I didn't do a thing As I said before, it works on the honor system

"And on only one occasion did a patient ask me to write off the full amount of his bill He was a young father who had lost his job some weeks before Jobs at that time were hard to find in this area

"Of course, I was happy to mark that patient's bill Paid in Full"



CHRIST ABOVE ALL

Lesson for August 11, 1974

Background Scripture: Colossians 1:15-29; Philippians 2:2-11

Devotional Reading: Colossians 1:15-27

Some time ago a woman was trying to explain to me some of her religious "hang-ups." Among these, she said, is the question of the importance of Jesus Christ. "I believe in God," she said, "but I can't understand why so much is made over Jesus." Her sincerity was both refreshing and challenging. Because she was willing to voice her doubts, I was given the opportunity to try to deal with them. I found myself wishing that more people would be as sincere in verbalizing their religious concerns.

The image of God

First of all, I told the woman that, for me, Jesus Christ is the highest of all revelations of God. She had indicated that she believed that God revealed himself in the lives of many people, including people outside our religious tradition. I too believe that God reveals himself in many ways, both inside and outside the church. At the same time, I have never found any source of revelation as complete and full as that which we have in Jesus Christ.

The writer of Colossians says it this way: "He is the image of the invisible God" (1:15). The word "image" can mean either a copy or the appearance of something. Obviously, Paul is not using "image" to incicate that Christ is a copy of the Father, but that he is the appearance of him. We often say of someone's child that he or she "is the image" of his or her father or mother. We do not mean they are an exact copy of the parent, but that there are great likenesses. This is what was meant in Genesis 1 when that writer says that man is created "in God's image."

I myself might say that when I look at Jesus Christ, I see the nature of God the Father. He is the most complete reflection of what God is all about. If I want to know about God, I look to Jeuss and find my answers.

All the fullness

Paul also suggests another reason for the centrality and supremacy of Christ: ". . . in him all the fullness of God was pleased to dwell" (1:19). When I look at nature, I find one perspective of God's nature revealed. When I read the prophecies of Isaiah, I find another perspective. If I read the holy book of another religion, I can find glimpses of God that speak to me. But when I contemplate the life and person of Jesus Christ, I find a picture of God that is three-dimensional.

This, to me, is the genius and uniqueness of Christ: not just one perspective, not just a portion of the picture, but "in him all the fulness of God" is represented. Like the Eastern mystic, Jesus was a man of prayer, meditation, and spiritual discipline. Like the Westerner, however, Jesus was also a man of action, of deeds as well as words. He is the perfect blending of all man's potentialities.

That is why to me Christ is above all.

NOW IS THE TIME . . .

TO INSULATE BUILDINGS

The old saying, "It pays to insulate" is still very true. As energy costs continue to rise, it is good economics to try and have buildings of all kinds that will do a good job of holding the desired temperature. There are many kinds of insulation and folks intending to build should evaluate the R-Factor of the various materials. In many cases it is not the thickest materials that will do the best job of resisting heat or cold losses. In nearly all types of home or building construction good insulation is considered to be a good investment. In farm buildings insulation is an important factor for good ventilation in addition to temperature control. Evaluate the R-Factor of the material before investing.

TO USE DRUGS CAREFULLY

Most drugs and medicines will do a good job if administered and handled properly. However, it is important to become familiar with the drug and use it according to the label directions. Everyone is residue conscious these days and authorities are quick to detect abnormal feed and food items. Such details as proper amount, witholding periods, and safe storage should be closely managed. The keeping of accurate records of the use of all drugs and chemicals is still very important and every farmer should have these records to prove his treatment. The local veterinarian should be the authority as to additional details.

TO INVEST IN FARM HOMESTEAD LIGHTS

Farm homesteads that have good lighting are becoming more common. Automatic lights that burn during the night provide protection for the entire family and are considered to be an excellent investment. The protection provided from prowlers and wild animals is well worth the cost; in addition, good lighting prepents falls and accidents, and makes night activities around the buildingsmuch easier. Most electric power companies have a rental or lease plan available for these lights on a monthly payment plan. We encourage additional use of these automatic lights.

TO PLAN FOR MAXIMUM PRODUCTION

Again the supply of feed grains seems to be short of the demand. Livestock and poultry producers face the problem of high grain prices, and depressed market prices for thier feed or food crop. This high cost of feeds could reduce the production of milk, eggs, and all kinds of meat to the point of scarcity and much higher prices. It appears that every farmer should again try to produce the maximum yield of feed grains on his land; the demand is strong and prices favorable. The planting of fall grains is now in the planning stage and maximum acreage is desired.

Farm Calendar

Sunday, August 11

11-16. XV World's Poultry Congress & Exposition, Rivergate, New Orleans.

Monday, August 12

12 - 14. Penn State adult farmer-teacher workshop, Ephrata Junior High School

12 - 16. Lebanon Area Fair.

Tuesday, August 13

9:00 a.m. - Dairy judging workshop. Open to anyone who'd like to learn about dairy judging. Conrad Weiser High School

Wednesday, August 14

9:00 a.m. - Livestock judging workshop. Open to anyone who'd like to learn about livestock judging. Conrad Weiser High School.

Thursday, August 15

Ephrata Area Young Farmers fishing trip, Rock Hall.

Friday, August 16

Fulton Grange Youth swimming party, home of Mr. and Mrs. Earl Albert Sr., Port Deposit Road.

Saturday, August 17

7:00 p.m. - Pomona Grange - picnic, Holtwood Athletic Field. Colerain Grange hosting.

Farm Youth Calendar

Monday, August 12

Aryshire, Jersey Brown Swiss 4-H meeting 7:30 p.m. at Muddy Running Park

Work night for Silver Spur Club

4-H Pig Show tagging and weighing in.

Tuesday, August 13

4-H Pig Show and Sale 8:00 a.m. Lancaster Stockyards

Mt. Joy Photography Club meeting 7:00 p.m. at Blassbrenner U.M. Church

Wednesday, August 14

Red Rose Baby Beef and Lamb Club tour in the Strasburg-Lampeter Area beginning at the Elvin Hess Farm 9:00 a.m.

Thursday, August 15

4-H County Achievement Day

Saturday, August 17

4-H Trip to Oxford County

DO-IT-YOURSELFERS FIND MANY USES FOR VINYL FABRIC

For "do-it-yourselfers" with more imagination than money, today's vinyl fabrics are a decorating delight.

The "new" vinyls are lighter weight; easier to cut and work with. Sewing them by machine is no problem, but for many projects, you can simply use glue. And vinyl still has its traditional "plus" over woven fabric of being easy to clean and incredibly durable.

The popular "leather-look" vinyls are more beautiful and convincing than ever. But today you can buy vinyls in whatever kind of look suits your fancy--bright florals, plaids, textured tweeds, wild geometrics, and sophisticated embossed patterns.

Vinyl fabrics can quickly and easily brighten up a window shade, coordinate kitchen cannisters and cookbooks, give new life to an old wastebasket. And many of the same Masland Duran vinyls that cover your upholstered furniture can also be purchased by the yard at department stores and decorator and upholstery fabric stores; so, the possibilities of coordination and contrast are endless.

For a beginner's project, try a vinyl tablecloth, perhaps in a bright solid or an Early American print like Duran's *Brandywine*. Then coordinate the tablecloth with your dining room window by covering the window shade in the same pattern. Here's how:

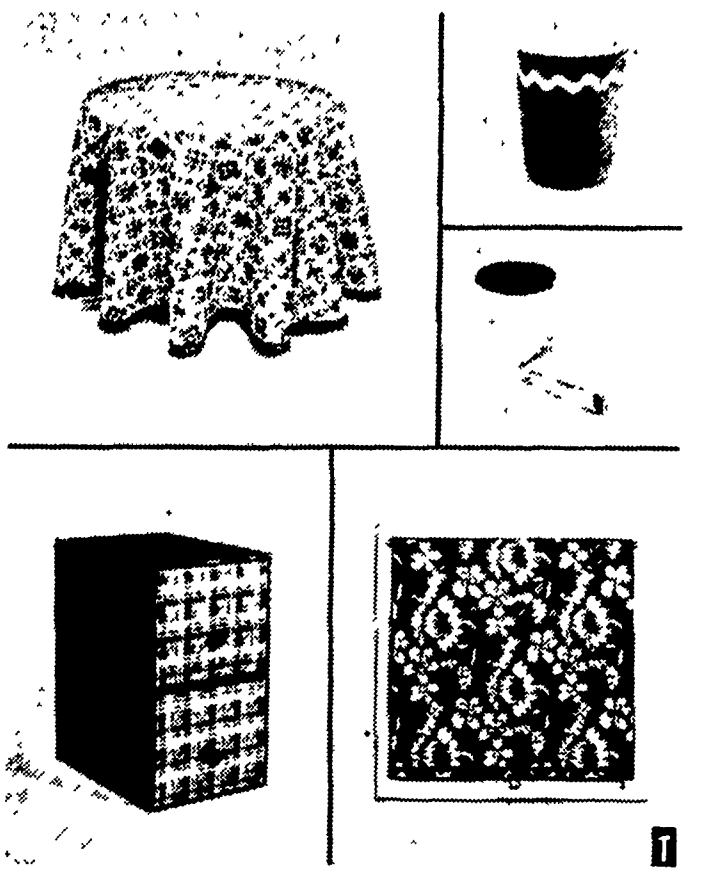
Versatile Round Tablecloth

1. Measure the width of your table top. Measure length from the top to the floor, and double this measurement. Add it to the top measurement. (For example, a 48" wide table with a 30" drop measures 48 + 30 + 30 = 108".)

2. Cut two widths of Masland Duran vinyl to the desired length (108" long each). Cut one of these 108" long pieces in half lengthwise. Sew the split width pieces to the full-width piece, one on each side, allowing 1/2" seams. Use your heaviest machine needle and a long sewing stitch.

3. Spread vinyl out on floor wrong side up and glue seams open. Divide your total measurement in half (108 ÷ 2 = 54"). Tie a string to a pencil and cut the string to this measurement (54"). Find the exact center of the fabric and use a thumbtack to hold the end of the string in place. Draw a circle as shown. Cut out the circle. No hem is necessary.

4. Turn fabric to right side and glue on desired trim--ball fringe, ribbon, rick-rack, cut outs.



Vinyl can be used in a variety of ways to add that personal touch to your home. Shown here (top to bottom, left to right) are a tablecloth made of Brandywine; wastebasket covered in Nomad (Parrot Green); cannisters and cookbook covered in Tiffany (Mustard); file cabinet front covered in Burgess; and window shade covered in Gala (red, white, and blue).

Perky Window Shade

1. Measure your window from the frame for width; from top to sill for length. Add 12" to length measurement for slat channel, hem, and safety margin. Cut the length of Duran vinyl needed.

2. Square the fabric. Place shade roller end against top left hand edge of vinyl. Make pencil mark on fabric at opposite end of barrel at top, center, and bottom of fabric. Use a ruler or slat stick to draw a line connecting the marks. Cut the vinyl along the line.

3. Place fabric face down. Measure up about 2" from the bottom and draw a line across the width of the fabric. Fold to this line and sew or glue fabric across width to make slat pocket. Glue or sew on trimming on right side and attach pull. Insert slat in pocket.

4. Align upper edge of fabric with roller center. Staple or tape top of material to roller, using center roller guide line. Be certain your fabric is absolutely straight on the roller.

Apply Your Chemicals With

STIHL SG17

- Easy to handle
- Weight 16.5 lbs.
- Range up to 33 ft.
- Handles dusts, liquid granulates
- Easy starting even while mounted on your back.

One of the questions I'm most often asked is this one How do I get my children to drink more milk?

That's easy to answer. Just tell me what your child's favorite flavor is Combine with milk and/or ice cream and it's easy as sippin' through a straw!

Is it peanut butter? Mix ½ cup of peanut butter with 1 pint of softened vanilla ice cream, then add 2 cups of milk and ½ teaspoon of vanilla extract, and you'll get 4 to 5 cups that will serve two or three children, nicely, and they'll thank you sweetly.

Is it chocolate and peanut butter? That's easy, too. Just substitute ¼ cup of chocolate syrup for the vanilla and beat all together. You'll then have a chocolate peanut butter shake.

Oh, peppermint is your child's favorite? Whip a pint of peppermint stick ice cream with 1 quart of milk, then top with scoops of peppermint ice cream. If you like, dress it up with crushed peppermint stick candy or give them a stirrer of a peppermint candy cane. They'll go for it.

A rainbow of milk drinks? Use a pint of sherbet for each quart of milk and stir together. You can select from orange, lemon, lime, pineapple or raspberry sherbets if the youngster wants variety

Don't forget the frozen fruit juice concentrates, as a base for milk drinks, too. You can thaw ¼ of a cup (or a 6-ounce can of the frozen concentrate), mix with a pint of vanilla ice cream, then add 3 cups of milk and gingerale to fill the glasses.

Food costs continue to spiral up, sad to relate. Economy's still the watchword in most American families.

Fortunately, the summer months make that economy easier because a hearty salad can be the mainstay of the meal. Everyone is familiar with the old favorite, potato salad, when fortified with frankfurters, cold cuts or deviled eggs.

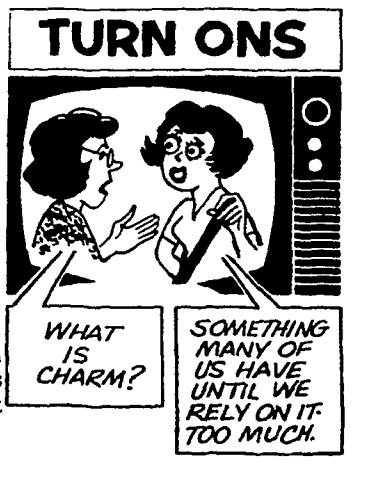
There are others, too. One favorite is a tuna salad which can be made in many ways. Another is poached fish fillets to which is added a bit of shrimp or crab meat; the latter two are fairly expensive, but they are neatly extended with plain fillets, flaked and cooled.

Still another interesting main dish salad calls for noodles, cooked and chilled. Then they're mixed with cottage cheese, dairy sour cream, caraway seeds, grated raw carrots and radishes.

Or, what about mixing cooked, chilled noodles with cubes of Swiss or Muenster cheese and some crunchy foods like chopped celery and green pepper, then ringing the bowl with bright, cheeky cherry tomatoes? If you like, add just a taste of meat with thin-sliced smoked ham from a 3-ounce package or sliced, spunky salami.

Rice in a salad? Yes, it can be delightful when prepared with any of the fish mentioned above. Add chopped celery, green pepper and sour cream.

Let dairy sour cream replace mayonnaise in these salads. Sour cream has 25 to 30 calories per tablespoon; mayonnaise, 65.



YORK COUNTY DHIA MONTHLY REPORT

June 1974

Just 2 pounds short of 1,000; and 8 year old registered Holstein cow owned by David Stewart, RD1, Delt completed the highest 305 day lactation. Eliza produced 24,365 pounds of milk at an average 4.1 percent butterfat totaling 998 lb. of butterfat. Second high was Carol, producing 22,671 pounds of milk at a 4.3 test for 968 pounds of butterfat, a registered Holstein owned by Sinking Springs Farm Inc., RD5, York.

Sinking Springs Farm was the high herd for daily butterfat pounds. 67.7 registered Holstein cows produced 57.1 lbs. of milk at a 4.0 percent butterfat test and 2.27 daily lbs. of butterfat. David Stewart's herd placed second with 54 registered Holsteins producing 54.3 lbs. of milk at a 3.8 percent test for a total of 2.06 daily pounds of butterat.

Wentink Defends Egg Advertising

In a statement responding to the Federal Trade Commission's seeking a cease-and-desist order in United States District Court at Chicago, Hendrik Wentink, chairman of the National Commission on Egg Nutrition, said that the American people have a right to know all the facts. "NCEN advertising has created a controversy and the controversy is in the public interest.

"The full cholesterol story must be put before the American public—not just one side of an issue which has created so much dissension in the ranks of the scientific community. That these ads have in themselves sparked further dialogue between researchers makes them worthy of attention. Additionally, they contained vital information on cholesterol which the public has a right to know.

"NCEN is exercising a fundamental right as a not-for-profit group. We have been providing documented, scientific information, not advertising a proprietary product to the American people. We did not make up statements in our ads and then liberally sprinkle our copy with quotation marks," Mr. Wentink stated. "When we quote from articles in the Journal of the American Medical Association, or from the works of respected medical authorities, we believe we are providing a service to the American people, a service which we feel we have the right to provide—indeed, an obligation to provide.

"The American Heart Association has, for years, been presenting but one side of a highly complex and most controversial scientific issue. NCEN is presenting its side of this vital health issue--including some newly published research which we have not seen disseminated by the Heart Association.

"The media have most commendably serialized publications on heart attack and atherosclerosis which we have not seen the Heart Association mention. Many new books have been published on this subject and we have not seen the Heart Association with its $55-million budget mention them either.

"There is a controversy in the scientific community and the controversy itself is in the best interests of the people because, inevitably, the controversy will stimulate research which will ultimately unearth the truth. But only research will unearth the truth," Mr. Wentink stated, "not ponderous pronouncements by one side."

Lititz Manheim 4-H Clubs

Lititz and Manheim 4-H Club recently held a meeting at the Lititz Brethren Church Pavilion.

The meeting was for family night and a covered dish supper was enjoyed by the members and their families.

Guest speaker was Grace Miller who gave a talk on the Penna. Dutch Culture.

Members were reminded to bring their completed projects to the Farm and Home Center on August 15th for the Achievement Day program.

Fun Night for the club will be held at the Riest Twins farm on August 29 at 7:30 p.m.

York 4-H Hort Club

The York County 4-H Horticulture Club recently held their July meeting which began at 7:30 P.M. The program began with a demonstration put on by Joyce Hemminger entitled "How does your garden grow?" Following this presentation, Mrs. Henderson, a York garden club member and certified judge, presented a talk on how to pick and present flowers for show. This was followed by a question and answer session. The next part of the program involved how to pick and prepare and show vegetables for show which was put on by Jerry Krone, a past 4-H member who was a member of the 4-H vegetable judging team in 1971. After his presentation, there followed a question and answer session whereby Jerry and David A. Hart, assistant County Agent, took charge. There was a total of 65 people present. A committe was formed to plan a York County 4-H Horticulture Show at the North Mall. The September meeting of the 4-H Horticulture Club will involve the construction of a terrarium. The club extends its greatest appreciation to Miss Megan Shaub and her mother for planning the evening program. If any York County Horticulture members who could not attend the meeting and are interested on being on a Horticulture committee, contact Jeff Roth at your earliest convenience.

Penn Manor 4-H Club

Penn Manor Community 4-H Club met at the home of Carl Thomas with a baseball game preceding the business meeting.

During the business meeting members were reminded to send all fund-raising potato chip money to either Carl Thomas or Jay Stauffer, outstanding membership dues to the treasurer, Jay Stauffer and photo and script to the club news reported for the completion of the scrap book.

The club chose Karen Greider as their Senior Queen and Cathy Martin as their Junior Queen for the 4-H Achievement Day.

President Karen Greider participated in the Achievement Festival at Penn State August 5-7.

The 4-H Exchange students from Maine were introduced to the group and shared the evening with them.

The next meeting will be held August 27, at 7:30 p.m. at the home of Guy and Yvonne Eshelman.

Weaver Named Manager At Salunga Agway

James M. Weaver, Conestoga R1, was named manager of the Salunga Agway store affective July 22. Weaver was formerly operations manager at the cooperative's Quarryville store.

An Agway employee since 1956, Weaver is married to the former Elvina Herr. The Weavers have one son.

HAPPY BIRTHDAY, ICE CREAM CONE!

The next time you see someone licking a cool, delicious mound of ice cream cuddled in a crunchy cone, you might give a sigh for those departed souls who lived before they yummy, tummy-tempting treat was invented.

The ice cream cone celebrates its 70th birthday this year. For it was in 1904 that America, which had already given the world the telephone, the airplane, the cotton gin and the loganberry, came up with the ice cream cone.

It happened, most accounts agree, at the St. Louis World's Fair. Thereafter, details vary. One version has a nameless concessionaire hawking a flat, sweet cake which he baked on a griddle before his customers' eyes. During a lull, he rolled one of his still-warm cakes into a cornucopia shape. But what could be put in the cornucopia? The vendor in the next stall was selling ice cream. He leaned over and begged a dollop for the open end of his creation — and the ice cream cone was born.

Unfortunately, according to this story, neither man saw that it was a great day in gastronomic history. But two other Fair employees were

BIRTHPLACE OF THE ICE CREAM CONE....A view of the St. Louis fair in 1904.

taken with the idea After the fair closed they went to Cincinnati where they began to experiment with baking cones They used a small hand oven and turned out hand-rolled sweet sugar cones and the pressed or molded type. Their products found a ready market and before long cones appeared in other cities

Automation got into the act in 1910 That was when Frederick A Bruckmann of Portland, Oregon, invented a machine that turned out 3,000 cones an hour He sold machine rights and territories to businessmen in various parts of the country and a new industry was launched

Nabisco, Inc. entered the cone business in 1928 by buying the McLaren Consolidated Cone Corporation Founded by Alexander McLaren, who early had obtained the rights to the Bruckmann machine for certain eastern territories, the company had a number of plants around the country.

One of the main features of the McLaren cones was the nesting ring of extra thickness around the outside of the cone near the top This permitted the cones to be packed

KING CONE...Woman employee packs 'em in.

FOR PALACE OR PALATE ...Ice cream cones can tempt a lad to dream.

one inside the other for shipment, without the disastrous percentage of breakage which plagued the industry in its early years.

Nabisco manufactures three basic types of cones: waffle cups, which come in assorted colors and flavors, waffle cones and sugar cones. One Nabisco plant, for example, bakes over 300 million cones a year.

The biggest switch in sales has been from regular size cones to be dispensed in stores to cups for home use. Mom's kitchen is becoming a do-it-yourself ice cream parlor.

Probably nobody knows the exact date on which to say "Happy Birthday" to the ice cream cone, but wittingly or not, millions of cones will be raised to the lips in celebration this year.

Since the most recent figure shows the United States consuming 786 million gallons of ice cream annually, what if it all were dispensed in single dip cones? It would come to about 194 cones eaten each year by every man, woman and child Of course, not all ice cream is consumed this way, but isn't it a delicious thought in this cone-prone world?

Field Day

(Continued from Page 1)

contest by David Becker, Mount Joy R1, who placed second in level land competition, but whose four-bottom plow made him the day's top large plow competitor.

Theoretically, a win in state competition could send any one of these men on to the national plowing contest in Ohio. In fact, though Pennsylvania plowmen will be unable to compete in this year's national contest because it's being held about a week before the state meet. State contest officials are trying to see whether or not this year's Pennsylvania winners will be able to compete in next year's national contest.

The matter is of more than passing local interest. In 1970, Burkhart won the state level land title and did go on to compete in the national contest. Last Sauder placed third in state competition for contour plowing honors.

The two division winners not only received $35 in prize money but also earned partially expense-paid trips to the state event. Becker agreed to finance his own trip, after winning $25 for his second place finish.

Taking second place in the contour division was Robert Hershberger, Quarryville R2, while Randy Johnson, Peach Bottom R1, placed third.

Clifford Holloway, Peach Bottom R1, placed third in the level land plowing, winning $15.

Judging the level land plowing contest were Roy Brubaker, Lititz R3; Merle Groff, and Edwin Harnish, Christiana R1.

The contour plowing contest was judged by Don Dodson, local fertilizer dealer; Ray Geisman, Farmers Home Administration, and Herbert Wiggins, a Millersville R1 farmer.

Charles Coates, son of Mr. and Mrs. Howard Coates, Nottingham R1, scored 346.5 out of a possibvle 400 points to win the FFA Land Judging Contest held in conjunction with the conservation field day. Coates is a June graduate of Solanco High School.

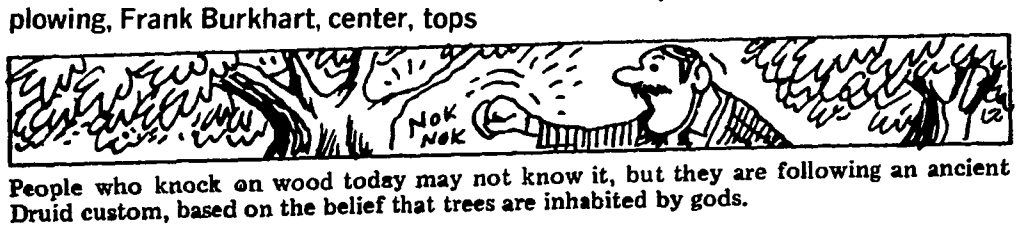
In Tuesday's competition, 12 youths from three county high schools judged soil and land characteristics against the contest judge, Warren Archibald, district conservationist.

Placing second with 308.5

Eight-year-old Mitch Miller proved he was the best chicken catcher at Tuesday's Lancaster County Conservation Field Day and Plowing Contest.

Lancaster Farming Photos

Tops in plowing competition in this year's Conservation Field Day and Plowing Contest were Harvey Sauder, left, who took first place in contour plowing, Frank Burkhart, center, tops in small plow and overall level land competition, and David Becker, who wielded the best large plow in level land competition.



People who knock on wood today may not know it, but they are following an ancient Druid custom, based on the belief that trees are inhabited by gods.

KEY TO PROFIT
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.

DOES IT PAY TO USE SILO KING ON CORN SILAGE? YES! SAVE WHAT YOU GROW.

Your Neighbor
WILLOW MAPLE FARMS
Harold & Donald Bollinger Newmanstown, Pa., Lebanon County

"We wouldn't like to fill our silos again without using **Silo King** in corn silage or haylage, because there is absolutely no heat in the silage as it comes out of the silo, and it stays fresher in the bunk longer. The overall quality of the silage is better than ever before, and the cows eat more silage in a shorter period of time.

Since we have better roughage and are on the complete **Agri-King** testing and feeding program, our cows have been holding production longer through their lactation. This is the first year our cows held production through the summer.

Our production on milking cows is up 16 1 lbs per cow per day more milk than one year ago and up 12.5 lbs. per cow per day on all cows. Our rolling herd average is 16,050 lbs. of milk and 633 lbs. of fat, the highest we've ever been.

The health of our cows has improved greatly. We haven't eliminated all problems, but have cut them to a minimum We feel this is due to following the **Agri-King** program as close as we can."

Charles Coates, center, was high scorer in this year's FFA land judging contest held in conjunction with the annual Lancaster County Conservation Field Day and Plowing Contest. Lewis Good, left, placed third in the competition, and David Keller, right, was second.

points was Lewis Good, Garden Spot High School.

Fourth place was won by Tom Galbreath, Solanco, while Steve Nolt, Garden Spot, took fifth, and Jim Bucher, Solanco, sixth.

Earlier this Summer, Coates placed second individually at the state land judging contest at Penn State. As a member of the first place Solanco judging team, he will compete in the International Land Judging Contest to be held at Oklahoma City next May.

It was hard to tell whether the kids or the pig squealed the loudest in the closing events of the conservation field day. A greased pig chase for children 13 and under saw a quick capture by Phillip Burton, a young Coatesville resident who not only got the pig, but more grease than anybody else. Eight-year-old Mitch Miller, Quarryville R1, turned out to be the best rooster rassler of the day. The bird was almost as big as its captor, and it was a little difficult at times to tell who was carrying who to a waiting cage. There was no doubt in Mitch's mind, though. Or the rooster's.

Phillip Burton was one greasy 12-year-old at Tuesday's Conservation Field Day, but he still managed to hold onto this squealing, wriggling porker long enough to claim it for his own. Now that he's got it, though, Phillip isn't quite sure what he's going to do with his little pig.

Retail Meat Prices Seen Down in Fall

Livestock and retail meat prices are expected to rise this summer as meat production declines from the spring level. But larger supplies and lower prices are again in prospect for the fall. And retail meat prices are expected to remain below year-earlier levels for most of the last half of 1974.

Demand for red meats will continue relatively strong. While gains in consumer income will be smaller this year than in 1973, they may still rise nearly 8 percent. Meat consumption is expected to exceed 1973's 175 pounds per capita but will not likely reach the 189 pounds consumed in 1972. Consumption during January-June was larger than a year ago. Beef and pork use rose over 2 pounds per person and more than offset a small decline in veal and lamb.

Hog prices fell into the mid-$20's per 100 pounds in early June before the seasonally declining slaughter turned the market up. Prices are expected to run in the mid-$30's this summer before beginning the usual fall decline. Hog slaughter should continue larger than a year earlier in the second half. Normal seasonal patterns are likely, with smaller summer output followed by an increase in the fall. Farrowing intentions suggest that slaughter in early 1975 will be down from both the fall and year-earlier levels.

Cattle prices dropped to the mid-$30's in June before showing any signs of advancing. Market prices this spring worsened the financial position of cattle feeders. In a $35 cattle market, losses above $100 per head were characteristic. An unusually heavy rate of slaughter during the spring that included many very heavy cattle accounted for most of the price weakness.

Cattle slaughter this summer likely will decline some from the high spring level and prices could rise to the mid-$40's. Fall slaughter is expected to increase and prices to decline again. Much of the increase in fall slaughter over last fall will continue to be in cows and non-fed steers and heifers.

A stronger summer fed cattle market would ease the financial stress of the cattle feeding industry, but prices may not rise enough to eliminate losses for many feeders. The general profit situation may improve by fall as cattle bought on the lower spring and summer feeder cattle markets are slaughtered. This would tend to encourage the feeding industry to increase placements.

Feeder cattle prices have generally declined since last summer's record highs. In June, yearling feeder cattle sold mostly in the $30 to $35 range. Downward pressure on the feeder cattle market is expected to continue although prices may gain strength during the summer from upturns in the fed cattle market.

Slaughter cow prices have dropped this year. Utility grade cows at Omaha averaged near $26.60 in June, nearly $3.50 below a year earlier. Continued heavier culling rates are expected to maintain downward pressure on cow prices in the second half.

Sheep and lamb slaughter dropped sharply in the spring and prices advanced to the highest levels on record in spite of weaker cattle and hog prices. However, lamb prices are expected to run seasonally lower this summer and fall.

Buck Tractor Pull Results

Top three winners in each class at the Buck Tractor Pull contests last week are listed below. The events were held Friday and Saturday evenings at the Buck Track in southern Lancaster County.

12,000-lb. Farm Class

1 - Joseph Trimble, Quarryville, Farmall 806, 206.5 ft.; 2 - Ben Nolt, Manheim, JD 4020, 189.6; Fred Hess, Washington Boro, IH 856, 165.3.

9000-lb. Farm Class

1 - Ed Brenneman, Willow St., 806 IH, 240.11; 2 - Ed Harnish, Christiana, Case 870, 236.2; Craig Frey, Conestoga, 560 IH, 224.0.

7000-lb. Farm Class

1 - Norman Walker, Glen Rock, 560 Farmall, 143.9; 2 - Ken Musser, Mt. Joy, Massey 178, 130.2; 3 - Harold Frey, Conestoga, 1938 JD, 127.3.

5000-lb. Open

1 - Glenn Darnell, Laytonsville, Md., Farmall M, 240.7; 2 - Charles Welsh, Gap, Case 8000, 198.3; 3 - Elwood Flowers, Manheim, Farmall M, 178.3.

9000 Modified

1 - Lester Landis, Lititz, 55 Massey, 285.1; 2 - Richard Zimmerman, Elizabeth-Town, Cockshutt, 289.11; 3 - Glenn Darnell, Laytonsville, Md., Farmall M, 250.10.

9000-lb. Super Stock

1 - Donald Thomas, Boonsboro, Md., 4020 JD, FP-131.6; 2 - Ed Harman, Frederick, Md., Int. 1466, FP-119.5; 3 - Ray Brubaker, Quarryville, AC D21, FP-119.2.

7000-lb. Open

1 - Lester Landis, Lititz, 55 Massey, 300; 2 - Richard Zimmerman, Elizabethtown, Cockshutt, 289.11; 3 - Glenn Darnell, Laytonsville, Md., Farmall M, 250.10

12,000-lb. Super Stock

1 - Alvin Martin, Akron, AC D21, 177.2; 2 - Ed Harman, Frederick, Md., Int. 1466, 158.11; 3 - Elvin Arment, Ephrata, Deutz 8006, 118.6

7000-lb. Modified

1 - Keener Pulling Team, Manheim, F-20, 205.1; 2 - Lester Landis, Lititz, Massey 55, 177.6; 3 - Gary Mills, Fallston, Md., Massey 55,130.7.

7000-lb. Super Stock

1 - Tim Stauffer, Ephrata, Deutz 9006, 289.4; 2 - Jim Brubaker, Quarryville, D21, 288.4; 3 - Elvin Arment, Ephrata, 8006 Deutz, 247.4.

9000-lb. Open

1 - Lester Landis, Lititz, 55 Massey, 275.4; 2 - Alvin Martin, Akron, AC D21, 234.00; Jim Brubaker, Quarryville, AC D21, 207.1.

15,000-lb. Farm Class

1 - Tim Robinson, Windsor, 1066 Farmall, 300; 2 - Tom Bedgar, Freeland, Md., 1066 IH, 175.0.

12,000-lb. Farm Class

1 - Tom Bedgar, Freeland, Md., 4430 JD, FP-152.8; 2 - Arthur Tracy, Freeland, Md., 1066 IH, FP-148.9; 3 - Amos N. Sauder, Manheim, Pa., Farmall 806, FP-122.3

Overseas Visitors Tour Pennfield Egg Operation

One item of interest on the Pennfield tour for foreign poultrymen was the manure dehydrating plant. Here, Hendrink Wentink, of Pennfield, and a visitor examine a batch of the clean, dry and odorless end product.

These Hungarian poultrymen are peering into one of the light-controlled laying houses at Pennfield's automated laying operation near Ephrata.

Two busloads of foreign visitors descended on Pennfield Corporation's number two egg farm near Ephrata on Monday. The visitors made the stop as part of a tour of poultry operations throughout the eastern half of the U. S. They're all on their way to the 15th World Poultry Congress scheduled to get underway Sunday, August 11, in New Orleans.

The Pennfield operation at Ephrata is believed to be the first automated "in-line" egg production-processing unit in the world, and was built in 1965-66. The foreign poultrymen saw a total of nine houses, each with some 30,000 layers. They viewed every step of the way as the eggs traveled in an even flow from the cages to the cartons. They asked questions about feeding, lighting, manure disposal, marketing, interest rates and birds.

Laszlo Sentirmai, a Hungarian who acted as interpreter for the first bus load of 39 visitors, told Lancaster Farming that he was very impressed with the Pennfield laying operation. Sentirmai is the director of a poultry processing plant in the southwestern portion of Hungary.

There were a great many Hungarians on the tour, along with Russians, English, Swedes, Danes, Yougoslavs, Czechs, and one Iranian. An American, Gil Eddy, was tour leader for the first busload. Eddy is market development manager for Diamond International. Before the start of the tour, Eddy presented a plaque to Donald Horn and Glenn Herr honoring Pennfield for creating the first large in-line laying complex. Horn and Herr are Pennfield executives.

Lancaster Farming Photos

Hendrink Wentink, left, shows a group of Hungarian visitors around Pennfield Corp.'s completely automated layer operation near Ephrata. The visitors were in this country to attend the 15th World Poultry Congress in New Orleans.

Pennfield Corp.'s Glenn Herr, left, and Donald Horn, center, accepted a plaque Monday from Gil Eddy, market development manager for Diamond International. The plaque honors Pennfield for building the first in-line egg facility in the world.

Watch Out for Crossfire When Working on Engines

If you're a stickler on neatness, there's one place it doesn't pay to be neat. That is under the hood of a engine when you are working on spark plug wires. In this case, it's accuracy not neatness that counts.

Some believe it's best to tape the plug wires in tidy bundles after plugs have been changed. By doing so, they are only inviting the dangerous condition known as crossfire.

Champion Spark Plug Company points out the engine crossfire can be a cause of engine roughness, backfire, detonation and in extreme cases spark plug or engine damage.

Ignition crossfire is a condition in which the spark plug is fired out of time due to induction. A strong magnetic electrical field develops around a spark plug wire when high voltage travels through it on the way to the plug. Sufficient energy is created to induce voltage into an adjacent wire if:

- The adjacent wire is placed close enough and runs parallel to the wire carrying the voltage and
- The adjacent wire leads to a plug in an adjacent cylinder which will be fired next in the firing order.

As a result both spark plugs will fire - one before it is supposed to fire.

To prevent crossfire, it is vital that all spark plug wires be routed properly and adequately separated. When changing plugs it may help to identify and match the wire to the proper cylinder by placing a numbered clothes pin on the wire while it is disconnected.

Most car makers provide plastic looms that secure the plug wires to the rocker cover. These help maintain the proper wiring arrangement and prevent the wires from being burned on the hot exhaust manifold. Should these looms be damaged or lost, they should be replaced as a further guard against crossfire.

Some Arabs believe that a heavy downpour can be stopped by quenching a fire with water.

Lanc. Co. Farmers Set Policy Meetings

Lancaster County Farmers Association, as in past years, will be holding policy development meetings the next several weeks, according to Earl Newcomer, Washington Boro R1, policy development chairman. This is the method the Pennsylvania Farmers Association and the American Farm Bureau use to decide the stance members want to take on important issues.

Some items for discussion are: safeguards for coop members; cost of OSHA regulations and standards; food and fiber reserves; sensible pollution control enforcement; cost of automobile safety and pollution standards and devices.

A list of members holding meetings at their homes and the dates are listed below. All meetings will start at 8:00 p.m., and Newcomer said all PFA members are invited to attend the most convenient one.

Monday, Aug. 12 - Richard Haas, Lancaster R6.

Tuesday, Aug. 13 - Harold Rohrer, Book Road.

Monday, Aug. 19 - Noah Wenger, R1 Stevens. Earl Smoker, Stevens R1. Earl Newcomer, Washington Boro R1. Donald Hershey, Manheim R2. James Kreider, Quarryville R2.

Tuesday, Aug. 20 - Paul Hartz, Morgantown R1. Ellis Mentzer, New Holland R2. Charles Rohrer, Paradise R1. Ralph Hostetter, Mount Joy R2. Jesse Wood, Nottingham R2.

Thursday, Aug. 22 - Vernon Umble, Christiana R1. Harold Ney, Marietta R1. Robert L. Kauffman, Peach Bottom R2. Frank Pieffer, Mt. Nebo. Chester Weaver, East Earl R2.

Monday, Aug. 26 - Titus Hess, Leola R1.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops

Dairy Princesses Named In Berks, Dauphin Co.'s

Debra L. Miller, the 17-year-old daughter of Mr. and Mrs. Paul E. Miller, Linglestown, is the new Dauphin County Dairy Princess. She was crowned last Friday night at the Middletown Community Building.

[Continued From Page 1]

County Dairy Princess, and Marcia Gnagey, who is this year's Pennsylvania Dairy Princess.

Miss Seidel is the daughter of Mr. and Mrs. Raymond Seidel, Richland. The 17-year-old dairyman's daughter is a June high school graduate who was employed over the summer as a dental assistant. She plans to work full-time as a dental assistant beginning in the fall. Miss Seidel is active in 4-H, church and Holstein organizations, and is a member of the Berks County Dairy Judging Team.

Ruth Ann Hartman was the runnerup in the Berks County contest. She is the daughter of Mr. and Mrs. Lloyd Hartman of Oley. Miss Hartman is a student at Penn State, where she is majoring in chemical engineering.

1974 Dauphin County Dairy Princess Debra L. Miller, with flowers, is shown here with the other contestants for this year's crown. They are, left to right: Ritha Fackler, Judy Marie Feidt, Marjie Kay Hoffer who was runner up, Kendra L. Wagner, and Melanie R. Matter.

Lancaster Farming Photos

Susan Seidel, center, is congratulated Saturday night by Marcia Gnagey, left, and Phoebe Ruth after she was crowned Berks County Dairy Princess at the Kutztown Fair Grounds. Miss Gnagey is the reigning Pennsylvania Dairy Princess, while Miss Ruth was the 1973 Berks County Princess.

Susan Seidel registered gleeful surprise when she was named 1974 Berks County Dairy Princess last Saturday night at the Kutztown Fair Grounds.

Ephrata Young Farmers Tackle Stream Cleanup

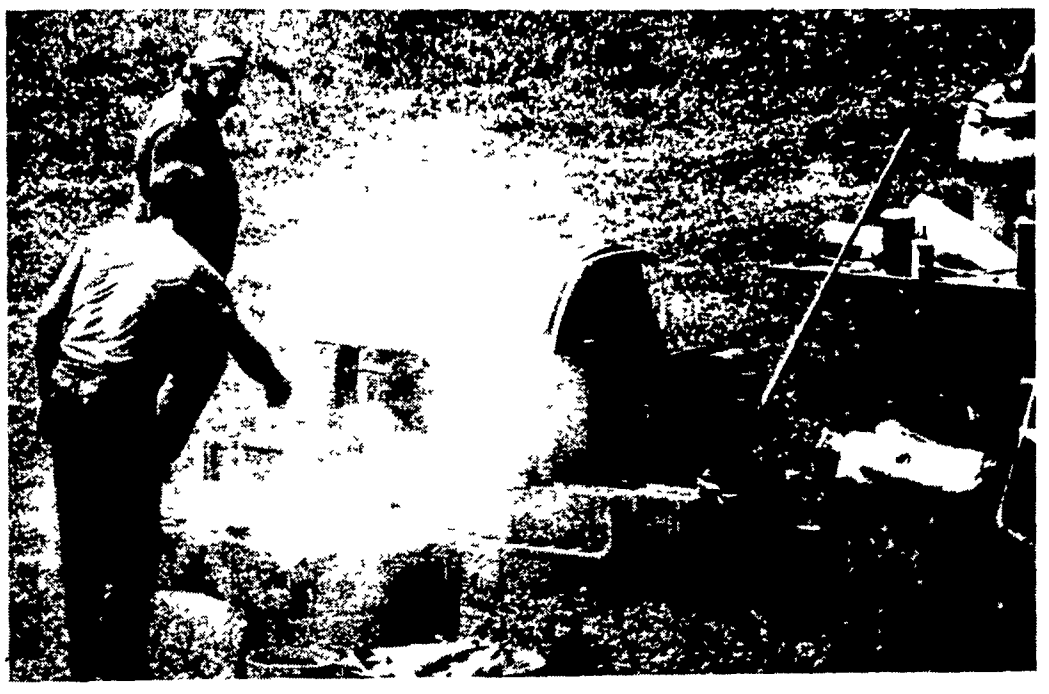
A group of about 40 members of the Ephrata Area Young Farmers Association converged on the Glenn Miller farm, Stevens R1, last Saturday morning. They came with chain saws, tractors, buckets, and chains. Some got wet and muddy, a few were covered with sawdust by the end of the morning, and everyone of the farmers there put in a good day's work by the time it was ready to leave.

What were they doing? They were cleaning up a section of the Cocalico Creek where it runs past the Miller farm. The cleanup operation was actually a joint effort between the Young Farmer group and the Cocalico Watershed Association.

The waterwhed association has been urging civic and youth groups to adopt a section of the Cocalico, and the Young Farmers picked the stretch that runs from Graybill's Dairy Store in Denver to Route 222. On Saturday they took truckloads of debris from the creek, much of it left over from Agnes. They also cut down dead trees that were in danger of toppling into the stream.

Marvin Sauder, chairman of the cleanup committee, told Lancaster Farming that the Young Farmers wanted to make the stream cleaner and healthier for wildlife, and they wanted to help preserve it. Their next step, he said, will probably be to install gabions at different points along the stream to prevent erosion of the stream banks and to stop the formation of sand bars in the stream channel. Gabions are wire baskets filled with rocks.

Truckloads of debris like this were wrestled from the Cocalico Creek and cleared from its banks last Saturday at the Glenn Miller Farm, Stevens. The stream cleanup project was a joint effort of the Ephrata Area Young Farmers and the Cocalico Watershed Association.



Although Bill Wingenroth's job of roasting the pig might have been the least backbreaking task during last Saturday's stream cleanup by the Ephrata Area Young Farmers, it had to qualify as the hottest, too. The pig was donated by Terry Scheetz, a Stevens pork producer.

Knock out herd health problems before the weigh in...

* TRAMISOL in feed knocks out four major lung and intestinal worms
* AUREO SP 250 fights disease, rhinitis, scours and cervical abscesses

A healthier animal weighs in heavier everytime.

West of Blue Ball on Rt. 23 OPEN THURS. & FRI. TILL - 9 354-4955

True Value HARDWARE

Zimmerman's Grand Opening Planned Aug. 15

Thursday, August 15th will mark the Grand Opening of the J. B. Zimmerman and Son Hardware Store in Blue Ball.

The spacious, air conditioned store will carry numerous gifts and houseware items along with the general hardware supplies and farm items.

J. B. Zimmerman began the hardware business in 1931 when he bought a hardware store in Blue Ball that had been primarily for plumbing and heating equipment.

When Zimmerman wanted to expand he moved to another store on Rt. 23 and added some more departments.

On June 3rd, J. B. Zimmerman and his son Charles once again moved to their present location on Route No. 23 near Blue Ball.

Charles explained that they needed more space to display their items and required more room for the additional departments such as housewares, automotives, and gifts.

Zimmerman's also carry DeLavel milking equipment along with tools and general farm supplies.

The store is open on Thursday and Friday evenings until 9 p.m., weekdays until 5:30 and Saturday until 5:00 p.m.

PEST PREVENTION

Planting your own vegetable garden may enable you to harvest not only the very freshest of foods, but also a sense of creative accomplishment

It is satisfying to taste the fruits of your own labors, and you may find that your children readily consent to consume greens they have grown themselves.

But you have to be prepared for pesky problems, and the problem of pests in particular!

The time to get rid of pests (other than foliar creatures) is before they have a chance to get into your garden, so apply pesticide before you sow any seeds It will help keep out some bugs if you mix it with enough water to achieve thorough coverage, spray it broadcast just before planting and work it into the soil immediately for up to eight inches depending on the plant, the pest and the label directions This will give your vegetables a good start, which you should follow up by giving them a foliar spray treatment later in the season

In order to achieve control as outlined above, you could use one of the insecticides available, such as Ciba-Geigy's Spectracide that contains the chemical Diazinon® This spray can be fast and effective against these creatures and about thirty-eight "hard-to-kill" insects that infest about thirty-eight different vegetables and other plants Spectracide can also be used on certain fruits and berries.

It will control the cutworms on your carrots, corn, lettuce, peas, red beets, snap and pole beans, tomatoes, radishes and cabbage, centipedes (or garden symphylans) on your radishes, root maggots on your cabbage and wireworms on cabbage, carrots, corn, lettuce, peas, snap beans and tomatoes.

In fact sufficient spraying--three fluid ounces per 500 square feet for cutworms and wireworms; three fluid ounces per 200 square feet for garden centipedes 1 5 fluid ounces per 1,000 square feet for mole crickets and 4 5 fluid ounces per 1,000 square feet for root maggots--should help assure you and your family that few soil insects will be around to eat into your enjoyment of your garden.

MINUTE MOLYFACTS

WHAT IS MOLYBDENUM?

IN PURE FORM MOLYBDENUM (PRONOUNCED MO LIB'DE-NUM AND CALLED "MOLY" FOR SHORT) IS A LUSTROUS, GREY METAL, HEAVIER THAN IRON MOLY MELTS AT A MUCH HIGHER TEMPERATURE THAN IRON DOES

THE WORLD'S LARGEST MOLYBDENUM MINE IS ON THE CONTINENTAL DIVIDE, 11,000 FEET HIGH AT CLIMAX, COLORADO MORE THAN 1 TON OF ORE IS REQUIRED TO PRODUCE ONLY 4 POUNDS OF MOLY.

A PURE MOLY METAL WIRE SUPPORTS THE TUNGSTEN FILAMENT IN YOUR INCANDESCENT LIGHT BULBS SMALL AMOUNTS OF MOLY ADD STRENGTH AND CORROSION RESISTANCE TO THE METALS USED IN AUTOMOBILES, AIRPLANES, EVEN THE BLADE OF YOUR STEAK KNIFE!

FOR MORE INFORMATION ON MOLYBDENUM, WRITE THE WORLDS LEADING SUPPLIER OF MOLYBDENUM, CLIMAX MOLYBDENUM CO, ONE GREENWICH PLAZA, GREENWICH, CONN 06830

PENNFIELD'S UNI-PEL DAIRY FLAKES SMELL

. . . but good!

Pennfield Uni-Pel Flakes No. 522 is a coarse textured dairy feed that smells and tastes delicious. And, because it is so extremely palatable, your herd will consume more—and produce more. It's an appetizing blend of steamed, flaked corn, crimped oats, molasses and pellets that are a highly concentrated source of nutrients. Uni-Pel has the right amount of Sodium Bicarbonate that helps maintain high milk-fat tests.

Call Pennfield today and discuss your feeding needs with a Pennfield feeding expert. Uni-Pel just may be what you need. Your herd will love it. So will your profits.

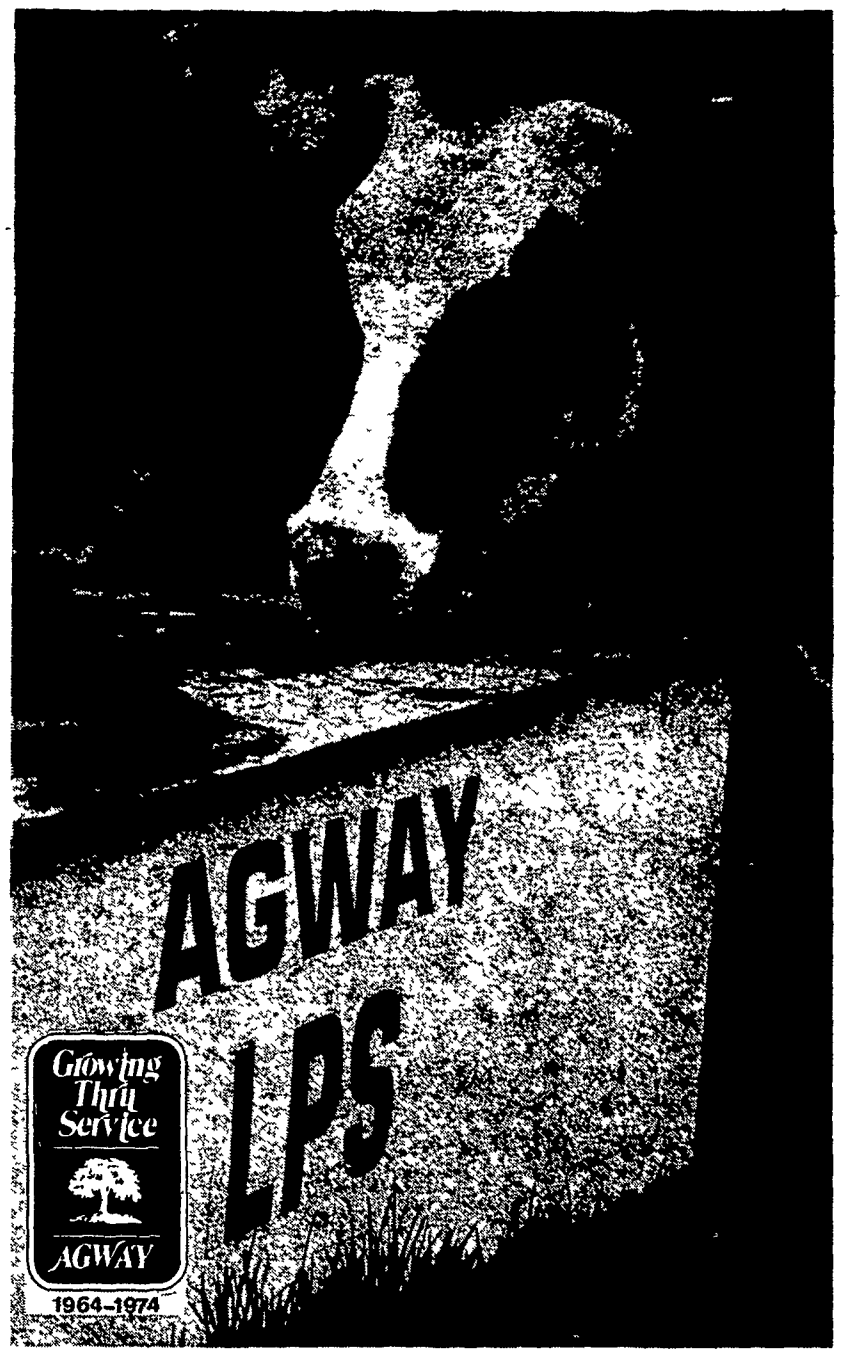
AGWAY

To Keep Milk production up, supplement summer pasture with Agway LPS fed free-choice



The protein content of pasture grass has just about hit bottom. And it won't recover until next fall. What's more—you simply can't make milk without ample protein.

So with summer pasture now supplying a good part—or all—of your forage, it's doubly important to make up for any protein deficiency with Agway Liquid Protein Supplement (LPS).

Agway LPS makes the difference

Put an LPS feeder in your pasture and let your cows convince you. It has been demonstrated, for instance, that in early spring, when pasture grass is protein-rich, cows consume little LPS. But as spring turns into summer, and protein content falls off, cows *increase* LPS consumption.

They're demonstrating the fact that Agway LPS can—and does—enable cows to maintain protein intake at the level needed to build a strong calf and sustain top milk production.

No doubt about it! LPS performs. A word of caution, however. Results described above do *not* necessarily apply to *other* liquid supplements on the market.

Agway LPS also provides a convenient source of the protein dry cows need to replenish tissues used up during lactation, and will help heifers grow to their full potential. Ask your local Agway to set up an LPS feeding program for you.

Maine Exchange 4-Hers Visit Lancaster County

by: Sally Bair
Farm Feature Writer

"People everywhere are basically very nice," according to Rusty Clark, Extension Agent for Oxford County, Maine. He was in Lancaster last week with a group of 23 4-H'ers from his County, and he has participated in eight inter-state exchanges so he's in a position to know.

The group arrived last Monday and left early Sunday, and filled every minute in between getting to know their host 4-H families and the county better.

Oxford County, Maine has a lot of agriculture, but it also has a lot of industry, Clark said, as he talked about the county in the dining room of the Lewis Bixler's, Marietta RD1, who were hosting him for the week. "Most of the industry is wood related - pulp and paper," he said. The state is, after all, 90 per cent wooded.

Maine is larger in geographical size than Pennsylvania, but it has fewer people, according to Clark, The county is located in southwestern Maine, and borders on New Hampshire and Canada. There are over 1,000 4-H'ers in the county.

In agriculture, there are some specialized dairy and poultry operations and a few general farms which have a variety of animals. Some farms have as few as one or two cows, Clark said and some have several hundred. He puts himself in the small farm category, living on a 128 acre farm on which he raises Jersey cows, sheep, chickens, geese, rabbits, and "a little bit of everything." He also has six children who help are for the assortment of animals.

One thing Oxford County has in common with Lancaster County is that tourism is a major industry. Most of the tourism centers around nature, but there are lots of motel for those who find camping a bit too rugged.

When asked what the biggest difference was between Oxford County and here, Clark answered emphatically, "Corn. There's a lot more corn grown here." He implied that everywhere he turned he saw field upon field of corn.

Something that is "very much different" according to Clark is the architecture. He was awed by the large stone farm houses which are found here, and said that most of the homes in Maine are constructed of wood. But the biggest difference among homes is that older farm homes in Maine are constructed with the barns and out-buildings

Just to show want she's learned while she is here, Cindy Robinson helps Pam feed calves.

Lancaster Farming Photos

Many ideas are exchanged over the dining room table. From left: Mrs. Lewis Bixler, Mrs. Helen Wivell, Pam Wivell, Cindy Robinson and Rusty Clark.

attached to the house. As he put it, "There may be a pantry, woodshed, workshop and then a barn or stable." The purpose, of course, was as protection against the severe winter, so there was alwasy easy access to all the necessary buildings.

He said such constrction is no longer found, because of the difficulty in obtaining insurance.

Another big difference is in the style of barns. In Maine, according to Clark, old barns are mostly two-story and wooden, although new barns are usually steel and pole, one story buildings. He added that bank barns are something new to him.

Cindy Robinson, 13, was a guest of Pam Wivell, Columbia RD1, and she talked enthusiastically about the exchange, saying,"I think exchanges are worthwhile to help to get to know the differences between the states." Pam agreed that it's a great was "to get to know the people from another state and to see how their life is different."

Mrs. Bixler, who was hosting Clark, said, "I thoroughly enjoy it. I think it's wonderful."

Pam's mother, Mrs. Helen Wivell, said, "I feel 4-H has hidden values which the young people recognize as they get older. It teaches them a lot about getting along with people."

Cindy talked about some of the projects she has as a 4-H'er in Maine - some were familiar ones, but some were different. She has belonged to a community club, which meets primarily in the winter, for two years. One project she has is fat lambs, which she will raise to be at least 65 pounds, and they will be sold at round-up. She said she has already told her father not to plan to eat any of her lamb!

She also has had sewing, and a slightly different project she has is raising guinea pigs. She said she has six, and explained that you show a guinea pig by holding it in your hand for the judge to examine it. What does a judge look for? Cindy said, "It should look good and be gentle and not bite." Other projects Cindy has are wildlife, one aspect of which is to feed the birds, and wild flowers, which consists of identifying and drying flowers.

For those who don't have room for an animal or inclination for something more active, Cindy also has a reading for a project. She explaind that those who enroll read books and write a review of them. She has also taken rug braiding and photography.

Cindy is actually a transplanted Pennsylvanian, having lived in Doylestown until three years ago. Her mother was from Maine originally, and so the family decided to move there. Her father works in a woolen mill. Cindy says, "It's pretty up there." The only disagreeable aspect of being here to visit is the weather. According to Cindy, "It's too hot!"

While visiting with Pam, Cindy is learning about Lancaster County farming and 4-H. She says she never knew what a capon was, which Pam has as a 4-H project. Pam has been a 4-H'er for five years, as a member of the Elizabethtown-Donega Community Club, and she just completed her first year as a member of the Lancaster County Holstein Club.

Cindy explained that the 4-H members who came to Lancaster had to help raise money for the trip. They had a clam bake supper where all those who wanted to come helped wait on tables. They also put out a special newspaper.

Cindy and Clark agreed that the people at home eat a lot of seafood since they are so close to the shore. Cindy learned to make Lancaster County shoo-fly pie, under the watchful eye of Mrs. Wivell. Clark's comment about the

Maine Exchange 4-Hers Visit Lancaster County

(Continued from Page 34)

food here is that it is "richer." Some new local dishes for him were chicken cornsoup and red beet eggs.

Sixteen-year-old Dan Dolloff visited with Darryl Bollinger, son of Mr. and Mrs. Elam Bollinber, Manheim RD7. His biggest 4-H project is raising 120 Holstein veal calves. He also has three beef cattle and a field crops project where he raises squash, pumpkins and 28 acres of sweet corn which he hopes to sell at a local fruit stand for 75 - 80 cents.

Gun safety and woodworking are other projects he has taken, as well as forestry, where he learned to identify trees and their habitats, and learned how to grow them and how to prune them. Although not a farm boy himself, Dan lives with a farm family on a 350 acre farm, about 125 acres of which are tillable.

At the Bollingers Dan helped to milk the 50 head of Holsteins, and said it is a lot different from the four or five times he had milked previously. He had milked in a milking parlor, and the Bollingers have a pipeline.

Dan said the growing season in Maine is a few weeks behind Pennsylvanian this year, although generally the seasons are about the same.

What's the biggest difference? To Dan it was the fact that there are "no mountains" in Lancaster County. He said, "I just can't visualize a place with no mountains." He said he feels the exchange is valuable in "seeing the different landscapes and learning the different ways of farming." Darryl agreed, "It's a good ways of farming." Darryl agreed, "It's a good way to meet other people and to find out how other people do things." Dan added that he had never heard of the Amish.

Another difference is that since so much of Maine is wooded, most farms do some work with their trees, and the one on which Dan lives is no exception. He said they cut the trees in winter and haul the logs out with work horses, and then sell the logs to the mill. He said they don't make too much money; it's mostly something to do in the winter.

Dan helped to cultivate some field corn at the Bollingers and he said, "If we had been doing it at home, we would have had to stop 20 times to remove stones." He said there are stone walls everywhere which were built with stones picked from the fields, and there could be five times as many fences because there are so many rocks in the fields. One springtime activity, of necessity, is cleaning the fields before planting.

Dan was also impressed with the size of some of the equipment found here in the county. Despite the fact that farms may be larger in Maine, most of them are not large tillable acreages, consequently, there is not need to have really large equipment. Darryl and Dan talked about feed prices, and agreed that they are about the same.

Dan will be participating in their county fair this year, exhibiting a beef which he won lasst year at a calf scramble. He explained that there were 11 kids for nine anmals and the first nine who got halters on and tied up the calves won them. The scramble was sponsored by the local fair association, and the only qualification was that you be a 4-H member.

During the week, the visitors had a chance to see Landis Valley Farm Museum, and the jugging operation of Robert Book, Leola. They also participated in the program and dancing provided by the Rutherford County 4-H Square Dancers on Saturday. There were interesting activities to participate in with their families too. Clark and Dolloff both attended the Holstein Field Day, and Cindy and Clark visited Park City. Clark was particularly impressed with his visit to Donegal Mills, the historic Donegal Church and Witness Tree and the Cameron Mansion.

All in all, it was an exciting week, filled with new experiences both for the visiotors from Maine, and for their hosts locally. Next week a busload of local 4-H'ers will return the visit, and spend a week getting to know Oxford County Maine.

The experience of living with people is one which will create a lasting understanding, and give the young people a unique opportunity for expanding their horizons.

York 4-Hers In Regional Dress Review

For eleven 4-H'ers in York County, August 9th will be a special day. They have been selected to represent the county at the Capital Region 4-H Dress Revue in Harrisburg. The event will begin at 9:30 in the Colonial Park Methodist Church, says Marceil A. Seckman, Ass't Ext. Home Economist.

4-H'ers who will take part in the regional revue are:

Holly Baer, R1 Spring Grove, Pa. 17362; Katrina Horner, 2486 Friesian Rd., York, Pa. 17402; Paula Lantzy, 220 Skyview Dr., York, Pa. 17402; Karen Raubenstine, R1 Hanover, Pa. 17331; Pam Spahr, R1 Box 365 Etters, Pa. 17319; Amy Swartz, R2 Hanover, Pa. 17331; Lucinda Wilson, R1 Glen Rock, Pa. 17327; Kay Raubenstine, R2 Hanover, Pa. 17331; Kay Swartz, R2 Hanover, Pa. 17331; Sue Ann Liek, 350 Maple St., Manchester, Pa. 17345; Carol Murray, Box 28 Emigsville, Pa. 17318.

These 4-H'ers started their costumes at the beginning of the 4-H club year. In addition to their sewing they had the opportunity to develop grace and poise, habits of good grooming, skill in decision-making and to help plan the county dress revue.

York County 4-H'ers will compete with those selected from the other counties in the Capital Region. The five top regional winners will be awarded gold ribbons. Each county contestant will receive a certificate of participation and a medal of honor.

The five gold ribbon winners from the Capital Region will compete with the top winners from each of the other eight regions for state honors. The state winner will be selected August 21 at The Pennsylvania State University, University Park Campus. Thirty-five 4-H'ers will participate in this event. The state winner will get an expense paid trip to the National 4-H Congress in Chicago, December 1-5.

The Cooperative Extension Service of the University and the Pennsylvania Retailers' Association sponsor the State Dress Revue program. Simplicity Pattern Company, sponsor of the National 4-H Revue program, provides the county medals and the trip to Congress.

Recipe Exchange. . .

Home On The Range

Junior Cooks

Within the next few weeks we would like recipes from youngsters 5-15 years of age. Ask your children or neighbors to send in their favorite recipe to be used in a special edition of Home on the Range. Recipes can be for any food dish. To insure publishing the recipes please make sure that they include all directions including baking time and all ingredients in the proper proportions. Please include name and age along with address. Each child whose recipe is used will receive a gift.

Store Home-Canned Foods Carefully

Properly home canned food stored in a cool, dry place will keep good eating quality for a year. Canned food stored near hot pipes, a range or a furnace, or in direct sunlight may lose quality in a few weeks or months, depending on the temperature.

A dry storage area is important because dampness may corrode the metal lids or rot the rubber rings on home canned food jars. This can cause leakage and subsequent spoilage.

Canned goods which have been frozen, thawed and refrozen, are safe to use IF the seal or container has not been broken. However, the quality will be poor and possibly unacceptable. If jars must be stored in an unheated place, protect the jars by wrapping them in paper or covering with a blanket.

If you follow directions for home canning carefully and the produce was in good condition initially, there is little chance of spoilage in your home canned foods. But you must always be on guard.

Look for leaks in containers. If you detect a leak, don't use the contents.

When opening canned foods check for unnatural odors. If an "off" odor is present, discard the contents. Do not taste canned foods before first boiling 10 minutes or more. Boiling will de-toxify any botulism toxin.

Corn Meal Rolls

½ cup sugar
½ cup cornmeal
1 teaspoon salt
½ cup melted shortening
4 cups flour
2 cups milk
2 beaten eggs
1 package yeast
¼ cup lukewarm water

Combine corn meal, sugar, salt, fat and milk in double boiler. Stir and cook until thick. Cool to lukewarm. Add eggs and yeast (dissolved) Beat well. Let rise in greased bowl 2 hours.

Add flour to form soft dough. Knead lightly. Let rise 1 hour. Knead. Roll out. Cut with biscuit cutter. Brush with fat. Place on oiled sheet and let rise one hour. Bake at 375 degrees for 15 minutes. Yields 3 dozen.

Makes a soft dough. Use flour to handle.

Lorene G. Horst
RD1, Mt. Pleasant Mills

xxx

Spice Cupcakes

½ cup shortening
2 cups brown sugar
2 eggs, separated
2¼ cups cake flour
½ teaspoon salt
½ teaspoon soda
1 teaspoon baking powder
1 teaspoon cinnamon
½ teaspoon each of cloves and nutmeg
1 cup sour milk

Cream shortening. Add sugar gradually and beat until fluffy. Add eggg yolks and beat again.

Sift flour; measure and add salt, soda and baking powder. Add dry ingredients with sour milk. Beat thoroughly after each addition.

Beat egg whites until stiff and fold into batter. Makes two dozen cupcakes.

Miss Cora Burkholder
RD1
Kutztown

Shoo-Fly Cake

Crumbs:
5 cups flour
2 cups brown sugar
½ cup lard
1 teaspoon soda
1 teaspoon cream of tartar

Liquid
1¾ cup water (hot)
1¾ cup mollasses
1 teaspoon soda

Put crumb part in a bowl and work together. For liquid put soda in hot water and add to molasses. Stir about ½ part of crumbs into liquid. Pour into greased baking pan and put remaining crumbs on top. Bake at 375 degrees for 45 minutes.

Sylvia G. King
Lancaster, Pa.

xxx

Soft Molasses Drops

¾ cup butter
1½ cup brown sugar
3 eggs
1 teaspoon vanilla
2 tablespoons molasses
1 teaspoon baking soda
3 cups sifted flour
1 cup raisins

Cream butter and sugar until light and fluffy. Add eggs and vanilla, beat well.

Combine molasses and soda. Add to creamed mixture. Gradually stir in flour. Add raisins. Drop on greased baking sheets. Bake at 350 degrees for 8 minutes. Makes 6 dozen.

Anna Mae Martin
RD1
Lititz

xxx

Strawberry Banana Sherbert

1 cup mashed fresh strawberries
1-3 cup mashed ripe bananas
2 tablespoons lemon juice
1-3 cup orange juice
1 cup sugar
1 cup light cream

Beat all ingredients together until thoroughly blended. Pour into refrigerator tray or loaf pan. Freeze one hour or until firm around edges.

Remove sherbet from freezing compartment and stir. Cover with foil and freeze 1½ hours or until firm.

Miriam Martin
Lewisburg

xxx

Grandma's Cracker Pudding

1 quart milk
¾ cup sugar
1 cup coconut
¾ cup coarse cracker crumbs
1 level tablespoon cornstarch
2 eggs
1 teaspoon vanilla

Scald the milk. Mix together sugar, crackers, coconut, and cornstarch. Stir into milk and cook slowly while stirring for a few minutes.

Dip a small amount over the beaten egg yolks then add and cook slowly for about three minutes while stirring. Add vanilla.

Pour in a casserole or dish that can be placed in the oven. Cool partially.

Beat the egg whites till stiff; add 1 tablespoon sugar and ¼ teaspoon vanilla. Spread on top of pudding and bake for about eight minutes in a 325 degree oven, or till golden brown.

Mrs. J. R. Stoltzfus
Gordonville, Pa.

xxx

Baked Corn

2 cups corn
2 tablespoons butter
1½ tablespoons flour
1 cup milk
1 tablespoon sugar
1 teaspoon salt
⅛ teaspoon pepper
2 eggs

Mix all ingredients together. Bake in a moderate oven 325-350 degrees until firm.

Fannie Esh
RD1, Christiana

Corn Pie

Fill pastry lined shell with:
2½ cups fresh cut corn
1 teaspoon salt
pepper to taste
2 tablespoons flour
1 cup milk
dot with butter

Bake 30-40 minutes at 350 degrees. Cover with pastry lid.

Mrs. J. Oberholtzer

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

WHICH TYPE FREEZER TO BUY

More people are growing their own vegetables and looking into canning and freezing foods. If your family plans to buy a freezer, you'll find that most freezers on the market today are standardized. Choice between brands may be of minor importance, except for servicing.

Your most important decisions will concern the three types of freezers available--chest freezer, upright freezer with manual defrosting, and a frost-free upright freezer--and the amount of freezer space you will need.

Upright freezers take up less floor space than chest freezers but all three types are available in a variety of usable storage space.

Chest freezers vary in size from 4 to 25 cubic feet of storage space. Most have from 3 to 5 inches of insulation. The evaporator coils, an integral part of the inside wall liner, provide for contact freezing–freezing takes place quickly when the food package is in contact with the walls.

Chest freezers are the least expensive to buy and lowest in cost to operate. Odd-shaped packages fit easily into the spaces and no space is wasted since there is no need for shelves or coils inside.

Chest freezers have some disadvantages. You must bend to load and unload. It's difficult to remove frozen food without moving other packages. And it's not easy to keep the packages in the freezer arranged orderly. Also, if food to be frozen is placed near the top, it may be the warmest part of the freezer and not freeze properly.

Upright freezers with manual defrosting vary in size from 4 to 10 cubic feet of space. The purchase price and operating cost are slightly higher than for chest freezers of the same size. With upright freezers, it's easy to organize storage of different kinds of foods and package sizes. Shelves on the door provide extra storage space and keep packages within easy reach. But unless shelves have front guards, food packages must be carefully arranged to prevent their falling out when the door is opened. Odd-shaped packages may waste freezer space. Upright freezers need to be unloaded, cleaned and manually defrosted about once a year.

Frost-free upright models are available in 12 to 20 feet models. They cost more to buy and operate, consuming almost twice as much electricity as manual-defrost models. With this type of freezer, foods to be frozen can be placed anywhere in the freezer. They need only to come in contact with the moving cold air. Since heat from food being frozen is removed from inside the freezer, food that is already frozen generally maintains its frozen state and quality. The air circulation which keeps the freezer frost-free also removes moisture from poorly packaged foods more rapidly than in the other types of freezers.

HOW TO SELECT BACON

Recent regulations for sliced bacon packages require new back windows or bigger front windows so you can see at least 70 percent of a length of a slice of bacon inside. But what do you look for?

Most people want bacon with a lot of lean. The distribution of lean within a slice of bacon affects its taste. When fried, bacon with several strips of lean distributed throughout the slice will tend to be more crispy. While bacon with the same amount of lean that's concentrated in fewer but larger sections will tend to be more chewy.

Since bacon comes in one pound, two pound, 12-ounce and half-pound packages, be sure to check the weight and compare prices, too.

Society 28

Society of Farm Women No. 28 met recently at the home of Mrs. Elvin Hess, Jr. Co-hostess was Mrs. Harold Byers. After being given tips on bicycle safety, the group embarked on a six mile bicycle hike. Mid-way through the hike the group enjoyed tasty bag lunches prepared by the hostesses.

There will be no meeting in August. The next meeting will be held Tuesday, September 17, at Cripple Creek 7:30 P.M.

French Pork Loin Roast

This is how the French pork loin roast is identified After being cut from the center of the pork loin, meat is cut away from the tips of the ribs of the roast to expose about 1 inch of bone Paper frills are placed on the bone tips after roasting The roast contains the loin eye and usually includes a portion of the tenderloin at the sirloin end The backbone should be loosened at the market by sawing across rib bones at base It is usually prepared by roasting

Easy Sewing Program Scheduled

"Easy Sewing for Easy Living" is your invitation to learn new time and money saving ways to sew your wardrobe. This informative program, sponsored by the York County Extension Service, is filled with practical sewing tips from how to stretch your wardrobe budget with coordination, to how to stitch-in-the-ditch. See and hear all about new easy sewing techniques like hemming with your iron, doing patch pockets without hand-sewing and putting in the Invisible Zipper in 5 minute or less. It's all designed to keep you up-to-date on what's happening in home sewing.

Ms. Nicki Antonacci, Educational Representative for the Unique Zipper Company will be presenting "Easy Sewing for Easy Living" on August 19, 1974 at 10:00 a.m., at York County 4-H Center. Besides telling you all about Easy Sewing, Ms. Antonacci will be available for a short question and answer session to help you solve your sewing problems.

Be sure to attend this special one hour program. You'll receive a complimentary copy of the Unique Invisible Handbook. The program is free and open to the public. This is a great way to spend a morning so mark it on your calendar. Anyone is invited. Register by calling the York County Extension Office, Court House, York.

Grow Your Own?

Many people in less fortunate countries of the world must engage in farming, part or full time, in order to eat. Here in the United States, research, education, resources and know how combine to release more than 90 percent of the population for work other than producing their own food Efficiencies in agriculture are so advanced that we're not only able to feed ourselves but also others throughout the world

Ida's Notebook

Ida Risser

Life gets so hectic--especially in the summer. If we didn't have automobiles and then had to stay at home, I believe everything would be simpler. But no one would want to do that as they afford us an opportunity to see many new sights.

The other week Allen and I took a two day trip to the Grand Canyon of Pa., and spent hours driving slowly through heavily forested areas in Cameron and Clinton Counties. This is the largest State Park and is known as the Bucktail Canyon. In fact we saw several orange colored doe and their spotted fawns. How they could leap when they spied us.

We stopped at two isolated cemeteries and noticed most stones were placed there from 1860-1880 with a few only a year old. There were the ordinary names like Miller and Jones plus others like McGonigal, Witchey, Chatham, Shade, Rohn, Narehood, Shoden, Wooster, Hidge, Handley and many others.

There were quite a few hunting cabins in this area and among the interesting names were the following: Stumble Inn, Smokey City, Sawdust Camp, Confusion, Devil's Elbow, White Rabbit, Hungry Hound, and Castaways.

Now that we are back, we can rush some more to catch-up on undone work.

XXX

I'm sure there are many "new " gardeners around this year. If they didn't start with too big a plot and if they conscientiously weeded week after week they probably are reaping a harvest by now.

There is one more "if" and that is if the wild animals didn't eat the vegetables before the gardener got to them. We've been troubled with raccoons for several years and feel we've finally found the answer-an electric fence about 3-4 inches above the ground. However it took two nights for them to learn.

For high efficiency at low cost feed your cows
Checkerboard Dairy

You can take advantage of present high milk prices by getting your cows to produce at their bred-in ability — at a low cost. Checkerboard Dairy is the milking ration for the dairyman who wants a highly efficient, yet a low-cost ration for his herd. Checkerboard Dairy has a balance of vitamins, minerals and protein cows need for top performance. And it's a complete milking ration, high in molasses for added palatability and pelleted for easy handling and feeding.

Put your herd on Checkerboard Dairy. See us today — and let Checkerboard Dairy help your cows produce all the milk that's bred into them — and let you take advantage of today's good milk prices.

Consultant, National Dairy Council

The Coolest Main Dish of All

It's hot and you don't feel at all like cooking a warm meal.

And why should you? A cool, cool salad can be the main dish for dinner tonight.

What's more a lot of people in the family could help prepare it, if they're willing. Make it fun and they probably will be.

Especially, your smaller children. Try them out on scraping carrots for carrot sticks. And preparing celery. Washing lettuce. Or cutting up boiled potatoes that now are cool.

A Variety Of Foods

If your salad is the main course, will you sacrifice protein in your meal? Not at all. In fact, your salad should, in this instance, contain foods from each of the four food groups.

Obviously you will build the salad on vegetables. There are several kinds of lettuce: iceberg, bibb and Boston. If you can, use all three along with other usual salad greens such as endive.

But here's a host of other vegetables to consider: Red kidney beans, canned greenbeans, slices of green and red peppers, onion, slices of radish, celery, cucumber, canned beets, and the carrots and potatoes mentioned earlier.

Obviously, we can next add fruit. Tomatoes are the staple, of course. But why not also consider some of these : rings or chunks of pineapple, peeled orange slices, raw apple, pieces of fresh or canned peaches, or grapes.

You should not expect to use all these foods. But at least this gives you a wide selection from the vegetables and fruits food group.

Now for the meat group: This gets into some preparation, but not necessarily, because so many things come canned, all prepared. Like tuna, or canned salmon, or various meats, especially the luncheon-slice variety which can be easily converted to bite-size bits. Don't forget sardines, anchovies or, for that matter, chunks of chicken, turkey, ham, or marinated beef, or slices of hard-cooked egg.

Dairy Foods

Dairy foods will be represented by your use of cottage cheese, chunks of other cheeses, and the part that sour cream, roquefort cheese and -or milk can play in your dressing.

And finally, the breads and cereals food group: One way is to stir in a lot of those delicious, often garlic-soaked croutons or sprinkle your salad with wheat germ. Another nice addition is serving some of the many cocktail dip-type crackers that are available.

For a beverage? Drink a cool glass of milk, or iced tea or iced coffee.

Wonderful Corn On The Cob

I like corn on the cob so much that I'd like to write about it more than once a year. But they tell me that would be overdoing it so I wait each year until now.

Fresh sweet corn is, to my taste, one of the great delicacies. It also occupies a central role in the development of America and the rural life that I experienced when growing up in Minnesota.

So let's talk about corn and how delightful it is again this summer as one of the great blessings we receive from the harvest season. Soiled or roasted, and with melted butter and salt, corn is one of the foods everybody in the family enjoys.

Have we always had corn? It has a fascinating history.

What Experts Say

According to experts such as G. F. Sprague of the U.S. Department of Agriculture and John R. Edwardson of the University of Florida, corn probably originated in tropical South America. Botanically it is an annual plant of the grass family. It is the most important cereal in the Western Hemisphere. Only wheat and rice exceed corn on a world crop basis.

Food semantics can sometimes be confusing. For example, in Britain and continental Europe the word "corn" has been used for centuries to mean any of the small-seed cereals such as barley, wheat and rye. "Maize" is, of course, a worldwide specific term for the several varieties of corn we are really talking about.

Which leads me back to the Americas and ancient times. Wild corn is believed to have existed as early as 80,000 years ago. Somewhere along the line the word "maize" was coined to describe corn.

The difference between wild corn (which has not existed for centuries) and our domestic variety was one of size and particularly of ability to reproduce. In wild corn, when the plant was mature, the husks opened to permit the wild corn seed to be released. In other words, it could reproduce itself. In modern corn, the husks must be opened manually or by machine to free the seeds.

Early Corn Fragments

Reconstruction of early corn fragments found in Mexican caves indicates the wild corn cobs were less than an inch long, and that they had an average 55 small seeds or kernals, arranged in pairs, usually eight rows. In contrast with today's corn (which has large ears borne low on the stalk), wild corn ears were probably borne high on short-stalked plants.

So wild corn pretty well perpetuated itself. Today, to reproduce corn, man must remove the seed from the ear, plant the seed, eliminate the competition of weeds and other plants, and harvest the ears.

But we grow and harvest a heck of a lot of it. And besides all the varieties of so-called "field corn," we have wonderful sweet corn for our dinner table. Enjoy! Enjoy!

ATTENTION DAIRYMEN:

Did someone say you should put in a 2 inch or 3 inch milk line? Yes, because the conventional pipe lines carry milk, and the milking vacuum in same pipe. Your galvanized pipe only carried pulsation vacuum (the vacuum between shell and inflation.)

Oh, a larger milker line may help your milker, but if a slug of milk goes down a 2" line your vacuum drops, just like in a 1½" line, so before you scrap that old 1½" line, why not use that old 1½" line to transfer milk only, and install another 1½" stainless steel line to carry your milking vacuum, with no milk or liquid in this line you have free moving air, no drop in vacuum. Then use the new Zero pipeline unit with above, you have the best milker you can buy, no air injection needed, to slug milk up the hose

Did you ever stop and think? Would you like that same air sucked through your drinking water

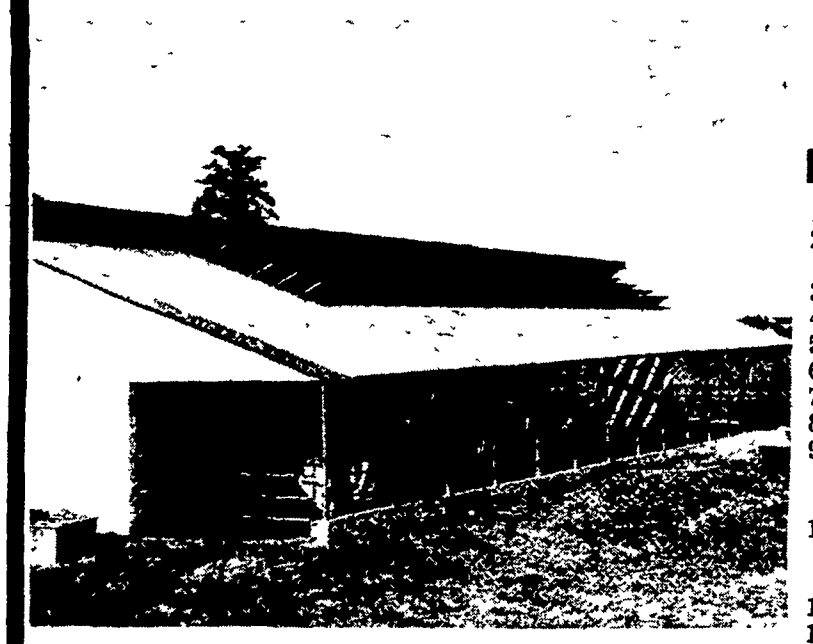
SOLAIR SYSTEMS



SOLAIR COW BAY WITH THE "SUN SENSOR"

FEATURES THE FOLLOWING:

1. Storm-and fire-resistant construction.
2. Rapid evaporation and dehumidification through "solar thermo" circulation.
3. Engineered for expansion.
4. Designed for either beef or dairy cattle.
5. Straight line scrape areas.
6. "Quick dry" floor areas.
7. North side ventilation — summer only.
8. Three sided wall structure — open South.
9. "Jalousie type" Southern roof provides direct sun rays on 80 per cent of floor — OPTIONAL.
10. "Sun Sensor" control automatically opens and closes optional jalousie roof for maximum winter comfort.
11. Complete herd grouping accommodations.
12. Automated feed control.

WE'RE INTERESTED IN ECOLOGY!

With our completely covered lots and a sun roof with an open peak, rain water does not enter the bay area and maximum evaporation of animal liquids is obtained. An "all-drained" floor system is installed and a curbed fence line keeps manure in place to be scraped into a liquid pit or a push-off loading system. By preventing manure run-off the surrounding area is not polluted.

Yes, since your urban neighbors and government fathers are interested in ecology, we are ready to help you build a system that will put you ahead on the pollution problem.

And, low moisture levels in Solair Systems results in less bacteria action and fewer odors.

ORGANIC LIVING

By

Robert Rodale

ENVIRONMENTAL TIME BOMBS WILL SURPRISE YOU

Long Islanders got an unpleasant surprise last winter. The sewage sludge that communities have been dumping ten miles out to sea suddenly turned up half a mile offshore. Aided by ocean currents, the gunk had slowly crept in toward bathing beaches, going undetected for years.

Surprises like that are becoming more and more common as man tampers with his environment. Deteriorating air and water quality attract much attention, but our food supply and personal health are vulnerable too. Because such processes usually take a long time before erupting in dramatic change, I call the phenomenon the "time bomb effect."

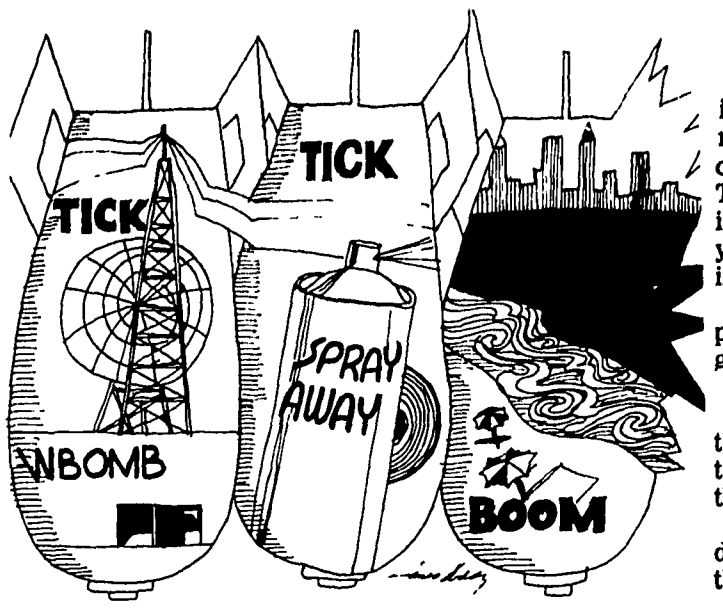
You don't need too potent a crystal ball to foresee some of the health surprises waiting for us in the not-too-distant future. In fact, some of the time bombs have already started to explode. And we can hear others ticking:

PLASTICS. Six cases of a rare liver cancer among workers at a vinyl chloride plastics plant have startled health officials. Thousands of workers are now being screened for the disease.

"We had our fingers crossed that nothing like this would happen with plastics," says Dr. Irving Selikoff, an authority on environmental medicine, but "the plastics era–now about 35 years old–is just coming of age in terms of latency period."

Vinyl chloride plastics are all around us, in aerosol sprays, food wrap, water pipes, shower curtains, phonograph records and car upholstery. Will this time bomb go off? "We're just beginning to see the effects of years of exposure to vinyl chloride," warns Dr. Joseph Waggoner of the National Institute of Occupational Safety and Health. "The potential for damage to the public health is open."

RADIO WAVES. Scientists have long known that microwave energy, as used in radar, can dangerously heat up parts of the body. Sight-robbing cataracts are one side-effect of overexposure.



But now a White House agency has warned that ordinary broadcast radio waves may affect human health and growth at levels lower than ever before expected. The evidence is not conclusive yet, but major cities (with many powerful broadcast stations), airports, military bases and tracking centers could be the most "radio-polluted" areas.

ASBESTOS. The city of Duluth, Minn., was shocked to learn last year that its drinking water is polluted with tiny asbestos fibers that might cause cancer. A metals processing plant had been dumping asbestos into the water for 18 years before the trouble surfaced.

HOT DRINKS. Doctors now suspect that people who consume extremely hot beverages regularly are more likely to develop cancer of the esophagus. It may take many years of drinking hot fluids before such throat abuse leads to disease. A simple test: If you can stick your finger into a hot beverage without discomfort, it's probably safe to drink.

ATOMIC RADIATION. Opponents of nuclear power plants have long maintained that tiny amounts of escaping radiation may lead to birth defects and cancer after many years of exposure.

At first, the radiation damage goes undetected. "Non-fatal injury to the cells of certain human tissues may be far, far more dangerous that the outright, immediate death of the cell would be," say physicists John Golfman and Arthur Tamplin in their book, "Poisoned Power." "These non-fatal injuries are especially hazardous because, within a period of years, a single cell injured in this way has the potential to initiate a cancer or a leukemia."

The whole process may take 20 years. "The intervening period is silent," they write. "The person doesn't realize it is going on. If asked about his health, he would, of course, say, 'I feel fine.' "

Sometimes the fuse is even longer. Damage is passed on through genes to future generations instead. Then when the time bomb finally goes off, it's too late to do anything about the original cause.

Painting a gloomy picture of environmental health isn't difficult. But there are pleasant surprises every now and then, also.

For example, the American Medical Association recently reported that the age-adjusted death rate for coronary heart disease is declining. What's more it's been going down since 1963, but very few people were aware of it. Some happy, unnoticed change in our diet or environment may be responsible, but doctors can't put their fingers on it yet.

Environmentalists were surprised to learn recently that the Great Lakes, once given up for dead, are actually becoming less polluted, thanks to vigorous action. Game fish like salmon and trout are returning to Lake Erie. And the Detroit River is reportedly running blue again in spots for the first time in recent memory.

Those are the kind of surprises we should get more often.

"Hot-Line to Health" is a 48-page guide that pinpoints present and future threats to our environment and health. You can get a copy by sending fifty cents to Robert Rodale, Organic Living, in care of this newspaper. Be sure to ask for the booklet by name and allow at least three weeks for delivery.

Pa. Simmental Association Organized

The organizational meeting of the Pennsylvania Simmental Association was held recently at the Sheraton Motor Inn, State College, Pennsylvania. The purpose of the Association is to promote the Simmental breed of cattle in Pennsylvania. Simmental cattle originated in Switzerland, but are popular in most European countries as a dual purpose breed–for both milk and beef production. Simmentals offer increased milk production, increased growth and leaner carcass.

Application for a corporate charter was approved by members attending the meeting. A board of directors was chosen, and officers elected.

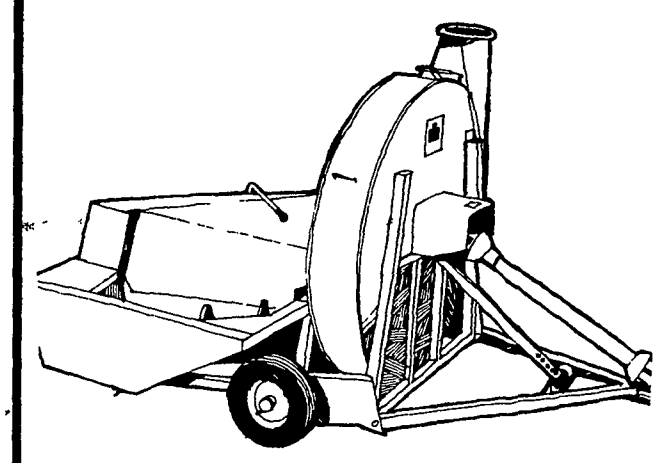
The board of directors is comprised of : Dr. Thomas D. Conrad Bird-in-Hand, Pa.; John P. Whiting, State College, Pa; Dalton Kirschner, Breinigsville, Pa.; Bill Hart, Leesport, Pa.; Roger H. Clapoole, Worthington, Pa.; Robert E. Armstrong, New Castle, Pa.; Joe Etter, Blain, Pa.; Gerald J. Brown, State College, Pa.; and Bob Elliott, New Bethlehem, Pa.

The first president of the Association is Dr. Thomas D. Conrad. Mr. Kirschner is first vice-president, Mr. Claypoole second vice-president, and Mr. Whiting is secretary-treasurer.

On Wednesday, September 4, 1974, at Beechdale Farms, Bird-in-Hand, Pennsylvania, the Association will hold its first field day. Dr. and Mrs. Thomas Conrad, owners of Beechdale Farms have indicated they expect a rather large attendance from Pennsylvania and surrounding states. Guest speakers will be Dr. L. L. Wilson, Professor of Animal Science at The Pennsylvania State University, and Dr. Don Vaniman, Executive Secretary of the American Simmental Association. Dr. Wilson will speak on crossbreeding of beef cattle for increased production. Dr. Vaniman will present the goals of the American Association and the progress of the Simmental breed in the United States.

All membership inquiries should be addressed to the Pennsylvania Simmental Association, Inc., P.O. Box 224, State College, Pennsylvania 16801

45-degree feeding system stops plugging, boosts capacity



56 BLOWER

The International® 56 Blower handles 100-tons of corn silage an hour blows it up to 100-ft or more

- Haylage, corn silage or wet corn is augered in a straight-line flow to rotor by 45° feeding system Speeds flow of materials through blower practically eliminates plugging
- Exclusive 56-inch diamater, straddle-mounted rotor Independent feed auger clutch.
- Simple, direct 540 rpm PTO drive Transport wheels adjustable for ground clearance, height or leveling

Let us show you why this 56 Blower works as fast as you can unload.

BEACON FEEDS
GET MORE with BEACON
LACTO-PELS "16" or "20"
Good Cows and Good Feeding Pay Off!
Formulated To Meet
THE NEEDS OF THE HIGH PRODUCER

Beacon Lacto-Pels are formulated to meet the needs of high producing cows, even when roughage quality is average or less than average. Lacto-Pels is a feed designed to get the most milk possible from the grain fed.

Cows relish this highly palatable feed and clean it up readily, even in milking parlors. Because they do, even the highest producers get the energy they need for top milk production without depleting body reserves.

Lacto-Pels are uniform, flow well and are especially suited to bulk handling and rapid feeding.

Protein is guaranteed at 16% or 20%. Fat at not less than 3½% and crude fiber no more than 8%. It's a highly efficient feed.

Palatability comes from the use of cane molasses with wheat middlings and other ingredients. Corn distillers grains are present as a source of fat and energy, and for their milk stimulating properties. Dehulled soybean meal is the chief protein source, and corn and wheat middlings all help provide the highly digestible energy.

Like all Beacon dairy rations, Lacto-Pels are fortified with trace minerals plus 3,000 units of vitamin A per pound and 6,000 units of vitamin D. This is three times the level of vitamin fortification in ordinary dairy rations and gives good insurance against deficiencies caused by poor or insufficient roughage.

Beacon Lacto-Pels help cows to maximum milk production for each 100 pounds of feed.

State Researchers At Grassland Conference

Dr. John S. Shenk and Dr. Robert F. Barnes, both with the College of Agriculture faculty at The Pennsylvania State University, presented two papers at the 12th International Grassland Congress held recently in Moscow, Russia.

Dr. Shenk is associate professor of plant breeding and Dr. Barnes is director of the Regional Pasture Research Laboratory of the U. S. Department of Agriculture, located on the campus. A native of Willow Street, Lancaster County, Dr. Shenk is a graduate of Penn Manor High School.

The two scientists described their research efforts with the field mouse or meadow vole. This small animal has been extremely useful in their studies where the feeding value of plant material needed to be assessed with less than a pound of dry matter.

Such was the case in their first paper entitled "The weanling meadow vole as a bioassay of forage and cereal grain quality." One of the areas investigated in this paper was the evaluation of the effects of foliar diseases on the quality of alfalfa forage.

Two of five diseases tested significantly lowered the feeding value of the forage as compared to healthy forage. These findings could not be entirely explained by changes in the protein or digestibility energy of the diseased forages.

To obtain forage infected with a specific foliar disease, the forage had to be inoculated and grown under carefully controlled environmental conditions. Under these circumstances only a small quantity of forage was available for feeding trials.

The second paper, "Isolation of compounds from crownvetch toxic to weanling meadow vole," reported the identification of B-nitroproponic acid (BNPA) in crownvetch forage. This paper was coedited by David L. Gustine of the U.S.D.A. Pasture Research Laboratory at Penn State. This discovery was the result of two years of research using the vole to monitor the chemical fractionation scheme for toxic compounds in crownvetch forage.

The concentration of BNPA in the forage ranged from 1 to 3 per cent, depending on management, storage, and genetic and environmental conditions. However, when a ration was formulated to contain only 0.15 per cent BNPA, and was fed to young growing chicks and swine, these animals lost weight and died.

Ag Progress Days Scheduled

Bloomsburg Fairgrounds located near the center of scenic Columbia County will be the site for the annual Pa. Ag Progress Days on August 28-29.

Numerous activities are planned for the two days. Along with the State Plowing Contest scheduled for August 28 at 10 a.m., there will be machinery demonstrations, family living displays, consumer and commercial exhibits along with livestock and horticulture programs.

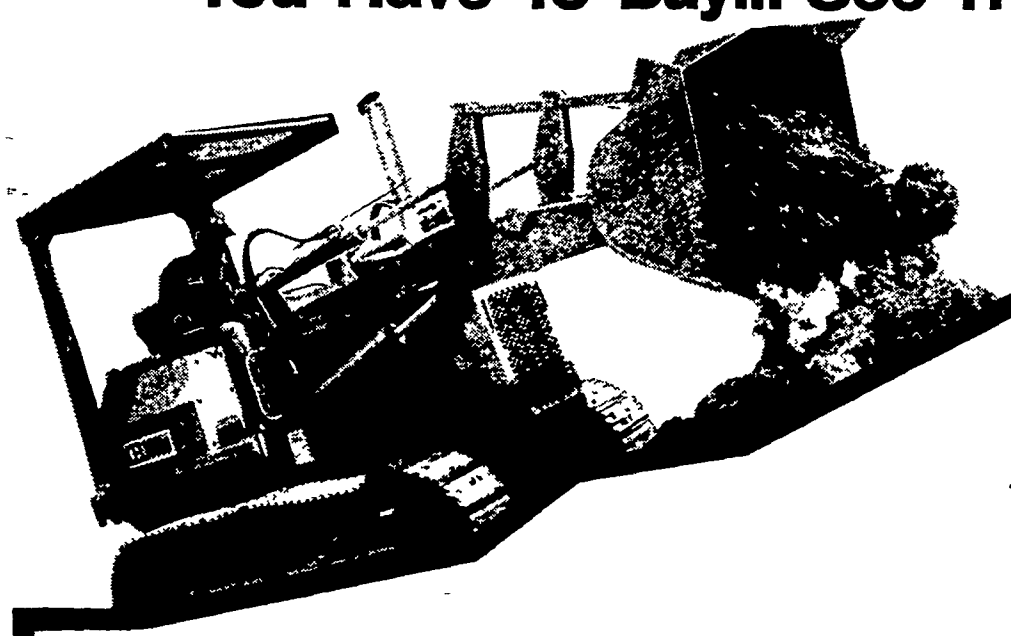
Craftsmen from all over the state will be displaying their craft items and demonstrating their work.

On Wednesday evening a program featuring square dancing, demonstrations on garden equipment and educational exhibits is scheduled.

Campsites are available near the grounds. For further information contact the Bloomsburg Chamber of Commerce in Bloomsburg, PA. 17815.

The site is located at the intersection of routes 11 and 42. For those using I-80, the fairground can be reached by taking exit 34.

Before You Buy That Track-Type Loader You Think You Have To Buy... See The Caterpillar 931



IF YOU ARE NOW THE OWNER OF A JOHN DEERE 450B...an IH TD7...or a CASE 450 ...YOU SHOULD KNOW THESE FACTS ABOUT THE CAT 931

Famous Caterpillar quality and dependability are evident in every detail on the 931. So, when buying or trading, you can have the confidence that comes with a CAT **at a price you can afford.**

The CAT 931 is versatile. You can match it to your work needs with a General Purpose Bucket, a Multi-Purpose Bucket, a Ripper or a Backhoe. Whatever application you need in a small trackloader, the CAT's ready for you.

We want to talk to people who thought they **could not buy** Caterpillar machines. We want to talk to people who **never thought** of buying Caterpillar machines. If you have a need for a small trackloader in your work, the CAT 931 is the one piece of equipment to fill that need.

When you combine the features and performance of the CAT 931 Trackloader with the skilled maintenance and parts availability you can count on from Cleveland Brothers, you've got a total package that's hard to equal. And if you consider financing a problem, give us a call. We can tailor financing to fit your needs.

Don't buy that machine you thought you had to buy. Come in and see us first. We think we'll change your mind.

To find out more about the CAT 931, call us in Harrisburg (717) 564-2121, or fill in and return this coupon.

English Students Attend Cowtown Rodeo

Eleven girls from the Cator Park School, Beckenham, England; attended the Cowtown Rodeo Saturday night.

The Rodeo is strictly a sport of American origin, and even today there is nothing like it in England.

The girls, who are staying with local families, are members of the Foreign Study League. They were especially impressed with the Bull Riding event. They had never seen a bull in action before and were thrilled at the agility, skill, and ability of the Cowboy to stay a-top the 2,000 pound beast!

Indeed they had reason to be impressed, Stanley Thomas of Cowtown, N. J. took top honors, on a bull named Snoopy, for a high score of 64 and prize of $154.84

Jack Meli of Spring Valley, N. Y. was still riding high on his Bare Back Bronc, Reckless, to place first again for $137.20 and a mark of 64.

Grant Harris of Cowtown has now won the Saddle Bronc competition three weeks in a row. This week his mark was 60 on a bronc named Ace High and pay was $78.40.

Penns Grove's Joe Merola roped his calf in very good time at 13.6 seconds for $143.08.

Steve and Barbara Stevenson of Neschanic Station, N. Y. won the Steer Wrestling and Barrel Race events respectively. Steve threw the fastest steer of the season at 6.4 seconds for $197.96. The former time was held by Tom Halikman of Monroeville, N. J. at 6.5 seconds. Barbara is top Point Awards winner in the girls event at Cowtown Rodeo, having won $1,004.35. She added another $143.08 Saturday by making her run in 17.86 seconds.

The English girls will without a doubt have something unique and educational to tell their friends, when they return to school in Beckenham.

Yorkshire Show Termed a Success

A crowd of nearly 200 people gathered at the Lebanon County Fairground on Friday, August 2 for the Pa. Yorkshire Co-op Association's hog sale.

Clair Flinchbaugh, Felton, showed the champion bred gilt which was purchased by Reno Thomas of Beavertown for $375.

Reserve Champion honors went to Thomas Arnold of Lebanon whose animal was purchased by Daniel Miller for $170.

Twenty bred gilts averaged 185.50.

In the Open Gilt division, Reno Thomas showed the grand champion which was purchased by Real Farms for $600.

Thomas Arnold showed the reserve champion which Clyde Hepner of Shoemakersville bought for $135.

The open gilts averaged $177.78

Littermate pairs of open gilts averaged $305.71. Champion honors in the division went to Reno Thomas of Beavertown. The animal was purchased by Leon Powell of Shawboro, Md. for $700.

Reserve honors went to Thomas Arnold of Lebanon whose gilt was sold to Elwood Houser for $310.

Grand Champion honors in the Boar class again went to an animal of Reno Thomas' and was purchased by Willis Bass of Edington, North Carolina for $625.

Reserve honors were captured by Thomas Arnold of Lebanon.

His boar was purchased by Big Willow Farms in Osterburg, Pa. for $200. Boars purchased average $210.50.

Pliny wrote that heliotrope plants could kill scorpions.

Growing Degree Days

In Lancaster County the average temperature for the week was 75 degrees, 1 degree over the normal.

Growing degree days for crops starting at 40 degrees totaled 3113 which is 56 days above the average. For crops beginning at 50 degrees, the days totaled 1899 which is 32 days over the average.

Rainfall for the week was 2.14 inches. Measured from April 1, 17.69 inches which is .6 inches over the normal.

Nissley Retires As Hoffman Sales Chief

Chris M. Nissley, widely-known in Pennsylvania for his work with farm seeds and crops, has retired as sales manager and a vice president of A. H. Hoffman Seeds, Inc.

He has been associated with the seed firm for the past 36 years, and has served as sales manager since 1963. Under his leadership company sales reached the highest point in its history.

Mr. Nissley was a pioneer in the formation of the Pennsylvania Grassland Council, and served as its president. In 1972 he was presented with the Council's award "for his outstanding contributions to the state's grassland agriculture." The presentation cited his numerous agronomy projects which relate to forage maintenance and production.

Among the other posts in agriculture held by the Hoffman sales chief were the presidency of the Pennsylvania Seedmen's Association, and a memeber of the President's Council of Funk Seeds International, Inc. He is presently a director and secretary of the Pennsylvania Foundation Seed Cooperative.

A native of Lancaster County, he received his bachelor's degree from Franklin and Marshall College, and did graduate work at the University of Pennsylvania and at Duke University.

He is married to the former Mabel Birk. A son, Scott, is a civilian engineer with the U. S. Navy.

LEADERSHIP AWARD — Chris M. Nissley (left) retiring sales manager of A. H. Hoffman Seeds, Inc., Landisville, Pa., is presented with an engraved bowl by J. Richard Godshalk, Hoffman president. The inscription cites "exceptional leadership as sales manager during our greatest growth years."

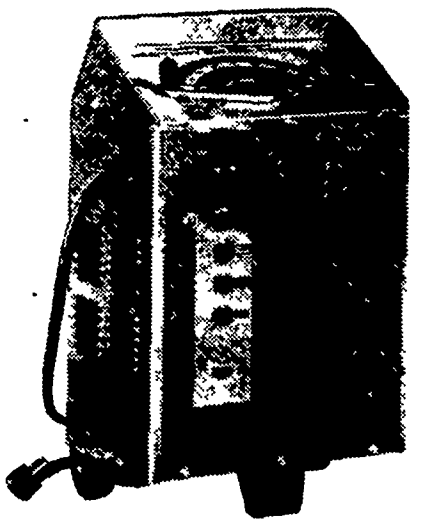
WELDING

CLINIC!

Featuring Underwater Welding.

Here's a rare opportunity . . . a chance for farmers and others to learn how to save valuable time and money by doing their own welding.

With improved new Twentieth Century equipment, it's easy. We'll demonstrate it. Then we'll let you try your hand. You'll see how easily you can do a multitude of repair jobs with a versatile new Twentieth Century heavy-duty welder. Remember, it's the handy, low-cost welder with these *8 exclusive features* . . .



1 Three welders in one.

2 A new 400 AMP cutting ground for faster and cleaner cutting, piercing and gouging.

3 Overhead and vertical welding easy as flat welding. Saves time.

4 Spot welding without attachements, with settings built in, for faster, stronger welds.

5 Soldering, also without attachments, with settings built in, for faster soldering without surface preparation.

6 Heavier construction — more copper and sturdier electrical steel protect against voltage loss, let you weld better, strike and hold an arc easier.

7 You get a "continuous welding" service guarantee — five years on parts, labor and repairs, twenty years on labor and repairs.

8 Battery charging with an inexpensive attachement for fast and slow charging of 6, 8, 12 and 24 volt batteries.

The Lancaster Dairy Judging Team took first place in the state contest. From Left to Right . . . Gary Akers, Quarryville, (high man in the contest) . . . Linda Kauffman, Elizabethtown, . . . Rick Hess, Strasburg, . . . Mr. Lee Jinks, State 4-H Club Leader . . . and Albert Mellinger, Strasburg. The team will represent Pennsylvania in the All American Junior Judging Contest at Harrisburg next month.

Susan Herr (on right) and her sister, Nancy, 840 Penn Grant Road, Lancaster with State 4-H Club Leader, Mr. Lee Jinks, and their plaque for winning top award in the demonstration division at the recent 4-H Achievement Festival held at Penn State. Their demonstration was titled, "BEEF UP YOUR BEEF BUYING HABITS."

Area 4-Hers Compete at Achievement Festival Days

Several hundred 4-H Club members from five surrounding counties competed for honors at the 4-H Achievement Festival held on Aug. 5-7th at the Pennsylvania State University.

Along with their demonstrations and team judging, the members were entertained by the Pennsylvania Ballet at the new University Auditorium.

Lancaster County

42 4-H'ers from all over Lancaster County brought home a host of medals and ribbons during the 4-H Festival.

The County's Jr. Livestock Judging Team placed first in the competition with three members placing as high individuals. Ken Brubaker, Lancaster, placed 1st with Gary Eberly of Denver 2nd and Richard Groff, Leola 3rd. Ronald Zimmerman, Ephrata the Fourth member of the team aided in placing the team first.

Gary Akers, Quarryville, was high individual on the Dairy Judging Team that also placed first in the state. Other members included Linda Kauffman, Elizabethtown, Rick Hess, Strasburg, who was 10th in individual competition and Rick Mellinger of Strasburg who placed 20th.

The Dairy Team will be traveling to the All American Invitational Show for competition in September.

Jane Gregory, Lititz, Donna Bare, Witmer, Heidi Bailey, Quarryville and Natalie Immel, Lititz comprised the Horse Judging Team that placed second in the state. The team had the highest reason score in the state. Jane Gregory was top individual in the state in reasons with Natalie Immel third. The team was surpassed by the Butler delegation by a mere 12½ points.

Steve Donough, Manheim, placed 7th in individual competition in the Senior Livestock Judging Contest. Other members that helped the team rank 5th were Mike Grube, Elm, Gordon Hoover; Gap and Dwight Houser, Lampeter.

Lancaster County's Consumera Team received a red placing in competition. Members of the team were Christine Erb, Mt. Joy; Karen Greider, Conestoga; Claudia Bard, Lancaster and Sandy Arnold, Landisville.

Fourth place honors went to the Poultry Judging Team which competed for the first time. Tim Grube, Elm; Judy Stoltzfus, Mt. Joy; Jim Sauder, Mt. Joy and Pam Wivell, Columbia comprised the newly organized team.

The sister team of Nancy and Susan Herr of Lancaster, captured a gold medal and first prize for their demonstration on Meat Buying Know How.

Gary Brubaker and Ken Longenecker of Lititz received a blue ribbon for thier team demonstration of Corn Silage additives.

Ronald Nolt, Mt. Joy, finished 4th out of 13 contenders for his demonstration in tractor driving.

In the public speaking division, both Joseph Lefever of Manheim and Nancy Henkel of Strasburg captured red ribbons.

Jane Gregory, Lititz, became a Keystone Award Winner from Lancaster County in the Achievement program.

The Horse Bowl team, which was just recently organized, placed 5th out of 30 teams in the State. Members included Leon Matroni, Lancaster. Cherri Gochnauer, Lancaster; Judi Anderson; Lancaster and Jenny Weber, Millersville.

Elizabeth Herr, Narvon; placed third and Andrea Gibson, Lancaster placed 5th in the Physical Fitness competition. Other members of the team which ranked 9th included: Darryl Bollinger, Manheim; Betty Jo. Bittler, Peach Bottom; Jon Bittler, Peach Bottom; Ted Gray, Lancaster; Genevieve Gibson, Lancaster.

An award of $25 was given to four members of the Mt. Joy Photography Club for their photo exhibit. The award is in memory of Carl O. Dossin, Jr.

Phillip Landis, Timothy Swarr, Darwin Nissley and Trudy Nissley were members who exhibited the photography work.

Lebanon County

49 4-H Club members from Lebanon County also participated in the 4-H Achievement Festival.

James Egnor, Lebanon; was high individual in the state in Flower Judging competition. Placing 2nd was Robert Bensing, Lebanon; 3rd, Maxine Noll, Lebanon and 4th Kathy Hoke. The team placed first in the State.

Elizabeth Herr, daughter of Mr. and Mrs. Robert Herr, RD2, Narvon tied for third place in the Physical Fitness competition. Presenting the plaque to Miss Herr is Mrs. Tillie Gibson, Nutrition Aide Supervisor for the Pennsylvania State University.

Kenneth Hoke, placed 5th in the Horticulture Judging contest. Other members of the team were James Conner, Lebanon; Ray Moyer, Lebanon and Michael Noll, Lebanon.

Horse Judging Team placed 21st consisting of Cathy Fetter. Lebanon, Elizabeth Wells, Annville: Robert Arnold, Fredericksburg and Elanine Kohr, Jonestown, placed 21st in competition.

Alfalfa Beetles Invade Area Counties

Cooperative U. S. Department of Agriculture (USDA) and state surveys have turned up additional European alfalfa beetle outbreaks in new Pennsylvania and New Jersey counties–and, for the first time, in the state of Maryland.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) point out that–although the beetle is known to be very destructive to alfalfa, legume forage and carnations in Europe–it has not been found attacking economically important crops here. Instead, the foreign insects have been found only on common roadside plants such as bouncing bet, tall out grass, white campion and milkweed.

To date, the beetles have been found in Beaver, Berks, Bucks, Cumberland, Dauphin, Franklin, Lancaster, Lawrence, Lebanon, Lehigh, Mercer, Montgomery, Northampton, Philadelphia and Schuykill counties in Pennsylvania; Bergen, Hudson, Hunterdon, Morris and Warren counties in New Jersey; and Washington county in Maryland. Officials say the number of discoveries indicates that the beetle has been in the U. S. for some time.

State-federal cooperative surveys are complete in New Jersey but scouting is continuing in Pennsylvania and Maryland where more infested counties may be found. Nearly all the discoveries are associated with railroad tracks and railroad yards. Officials feel that moving railroad cars have been the beetle's method of spreading through the three-state area.

Editor's Quote Book

Enjoyment of the present is denied to those who worry too much about the future

MARYLAND MONTHLY HOLSTEIN AUCTION

At my Maryland Farm Sale Barn, located one-half mile Northwest of Woodsboro, on Route 550, Frederick County

REGISTERED GRADES

100 TOP CHOICE HOLSTEINS 100

DAIRYMEN: This is the Best group of cows we have ever had for Sale! About 40 extremely Top Purebred Cows, from 3 to 5 years old. 20 high Quality Purebred first-calf Heifers. Some of these cows and heifers are good enough to Show. 40 Grade cows and heifers, all hand-picked by us. They're as good as they grow! Here are a few of the better ones:

A beautiful, young, 4 yr. old SIMPSON FARM TIDY GENT Daughter. She's a Show Cow with High Production - VG85. Just look at this Pedigree: 3 yr. 390d 2x 20,253 3.6 728f; Her Dam - GP 4-01 337 2x 20,445 5.2 710; 365 2x 21,416 749; Lifetime: 103,630 4370. 2nd Dam - G 4-02 311 20,111 7.3 653; 292 2x 21,361 711; Lifetime: 127,355 4140. 3rd Dam 8-11 348 2x 20,642 647. 4th Dam 8-09 297 17,559 616.

She was bred January 5, 1974 to GROOKER GOLDEN REFLECTION - VG; Mammary 22,111. 3 generations: all over 20,000 Milk. A real nice cow!

2 Top Choice 2 yr. old PAWNEE FARM ARLINDA CHIEF Daughters, Bred from 11-3-73 to 5-30-74 to LENAPLE IVANHOE REBEL (a son of PENSTATE IVANHOE STAR). One from a Dam 3-03 311d 2x 15,156 3.8 582f. G Dam - GP84 4-07 305 2x 25,050 3.6 911; 5-10 305 2x 26,380 3.4 801. The other from a Dam: 4-10 338 2x 14,931 3.5 528.

Here is a pair of good ARLINDA CHIEF Daughters!

A Fresh PENSTATE IVANHOE STAR Daughter from a Dam: 370d 2x 21,437 692f. This Heifer is milking over 60 lbs. already - a good, big stand-up Heifer!

A good, big, beautiful GLENHOLM ALERT DEAN PABST daughter, VG from Canada. Bred November 12, 1973 to WHOLESOME PERSEUS LEADER. 4yr 286d 2x 12,360m 4.3t 531f (Canadian record) She has the possibility of being an EXCELLENT cow!

3 PACLAMAR ASTRONAUT Daughters: One 2 yr. old, from a Dam: 5-02 341d 2x 17,390m 3.8t 660f. One 2 yr. old, from a Dam: 2-0 305d 2x 14,310m 3.9t 557f; Gr. Dam VG-88. They were bred from November 3, 1973 to January 14, 1974 to D Q A Pride Astronaut.

2 PACLAMAR IVANHOE BLACK EAGLE Daughters. Dam of one 2 yr. old: 2-01 305d 2x 12,501m 3.8t 474f; Gr. Dam GP-84: 5-02 305d 2x 18,396m 4.2t 779f: Over 103,000 lbs. milk.

SEILING ROCKMAN, LASSIE LEADER, ROCKDALE PRESIDENT, GLENAFTON MAN-O-WAR, MILK & HONEY IVANHOE, ALLOIS REFLECTION MARQUIS daughters; plus many others from top Sires.

FARMERS: If you need some good cows, or just like to look at real cows, come to this Sale. We will show you 100 Head like you have never seen together in one barn!

Cattle will be tested within 30 days of Sale for TB and Bangs for Interstate Shipment.

Several Purebred Heifer Calves will be sold.

HAY & STRAW:

Mixed hay and long straw, also selling a complete line of miscellaneous shop tools, etc.

SALE BY THE ORDER OF
MR. & MRS. EVERETT H. DAVIS

Also selling for on the same day, Mr. Arthur B. Davis who has also sold his farm and has moved the following to his brother's farm to be sold:

1963 M.F. 65 tractor, gas with high wheel clearance; 1971 J.D. 24T baler less than 10,000 bales; M.F. front end loader; M.F. No. 61 mounted corn picker; Century sprayer; N.I. manure spreader; Case 9' Disc harrow; Gehl hay conditioner; Case tiller-packer, 1 Grain wagon; N.H. flail chopper; Oliver 3 bottom 16" 3 point hitch plow; 3 flat wagons; David Bradley hay rake; 3 point hitch post hole digger; Grove 40' elevator, 34' of Little Giant MOW conveyor; 72' of Smoker MOW conveyor; 10' Hay rack; J.D. Van Brunt 15 disc grain drill.

AUCTIONEERS NOTE: With the never ending rise in new machinery prices and the now present machinery shortage, this sale is an excellent chance to buy the machinery you need in time to use it this fall. As you can note I have only listed the larger items, but be assured there are many more pieces of machinery to be sold at this sale. Many pieces of this machinery were purchased new in the last three years. All of this machinery has had the best of care and is in good condition. See you at the sale.
